SUPPLEMENTARY INFORMATION:

I. Abstract

The proposed information collection activity provides a means to garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences, and expectations; provide an early warning of issues with service; or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

The solicitation of feedback will target areas such as: timeliness; appropriateness; accuracy of information; courtesy; efficiency of service delivery; and resolution of issues with service delivery. Responses will be assessed to plan and inform efforts to improve or maintain the quality of service offered to the public. If this information is not collected, vital feedback from customers and stakeholders on the Agency's services will be unavailable.

Authority: NASA is committed to effectively performing the Agency's communication function in accordance with the Space Act Section 203(a)(3) to "provide for the widest practicable and appropriate dissemination of information concerning its activities and the results thereof," and to enhance public understanding of, and participation in, the nation's aeronautical and space program in accordance with the NASA Strategic Plan.

II. Methods of Collection

The Agency will only submit a collection for approval under this generic clearance if it meets the following conditions:

The collections are voluntary;
The collections are low-burden for respondents (based on considerations of total burden hours, total number of
