

defined terms from Rule 1.<sup>16</sup> Finally, NSCC would remove Section 2(i) of Rule 58 concerning the limitations on NSCC's liability for the completeness or accuracy of LM Trade Date Data, LM Member-provided Data, LM Transaction Data, or other information or data which it receives from Members or third parties and which is utilized in DTCC Limit Monitoring, or for any errors, omissions or delays which may occur in the transmission of such data or information.

#### IV. Discussion and Commission Findings

Section 19(b)(2)(C) of the Act<sup>17</sup> directs the Commission to approve a proposed rule change of a self-regulatory organization if it finds that such proposed rule change is consistent with the requirements of the Act and rules and regulations thereunder applicable to such organization. After carefully considering the Proposed Rule Change, the Commission finds that the Proposed Rule Change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to NSCC. In particular, the Commission finds that the Proposed Rule Change is consistent with Section 17A(b)(3)(F)<sup>18</sup> of the Act.

Section 17A(b)(3)(F) of the Act requires that the rules of a clearing agency, such as NSCC, be designed to, among other things, promote the prompt and accurate clearance and settlement of securities transactions and, in general, to protect investors and the public interest.<sup>19</sup> The Commission believes that the Proposed Rule Change is consistent with Section 17A(b)(3)(F) of the Act for the reasons stated below.

As described in Part II above, Limit Monitoring is a voluntary tool intended to supplement a Member's internal risk management processes and use of other available tools. Although the tool was created in response to an industry-wide need due to trading risks associated with new market technologies in 2014, there now is a broader range of options available to Members to help manage these risks. Limit Monitoring is not a widely used risk management tool, and those who do use it did not raise significant concerns about its elimination. Given that NSCC would need to invest significant resources to continue to offer Limit Monitoring to its

Members, decommissioning the Limit Monitoring tool should allow NSCC to determine where to allocate the resources that would have been used on updating the Limit Monitoring technology to better react to the changing needs of market participants who rely on NSCC's central role in the securities market. This ability to allocate resources should, in turn, help NSCC to continue to promote the prompt and accurate clearance and settlement of securities transactions by NSCC, consistent with the requirements of Section 17A(b)(3)(F) of the Exchange Act.<sup>20</sup>

Accordingly, and for the reasons stated above, the proposed changes are consistent with Section 17A(b)(3)(F).

#### V. Conclusion

Based on the foregoing, the Commission finds that the Proposed Rule Change is consistent with the requirements of the Act and in particular with the requirements of Section 17A of the Act<sup>21</sup> and the rules and regulations promulgated thereunder.

*It is therefore ordered*, pursuant to Section 19(b)(2) of the Act<sup>22</sup> that proposed rule changes SR-NSCC-2024-004 be, and hereby are, approved.<sup>23</sup>
