

The purpose for the Proposed Action is to successfully manage Federal land in the Falcon Project. Federal lands associated with the Falcon Project have been utilized by the public for various activities, including grazing leases, since the Falcon Project was established. However, the economic value of these leases and the challenges to successful land management require a reevaluation of the grazing lease program. The need is to implement land management alternatives to grazing leases that address low grazing lease values, limited access by USIBWC to leased lands, and unauthorized activities on leased lands.

Pursuant to section 102(2)(c) of the National Environmental Policy Act (NEPA) of 1969; the Council on Environmental Quality Final Regulations, and the USIBWC Operational Procedures for Implementing Section 102 of NEPA, published in the **Federal Register** September 2, 1981, USIBWC developed a Draft EA in November 2023 that analyzed eight alternatives for modifying the grazing lease program at the Falcon Project, including the No Action Alternative. Alternative 1—No Action Alternative, is a requirement of the NEPA process and is included to provide a baseline against which the other alternatives can be evaluated. The action alternatives include: Alternative 2—Terminate Leases, Alternative 3—Change Rental Rates on Active Leases and Implement Improved Program Management, Alternative 4—Allow Hunting on Existing Grazing Leases, Alternative 5—Terminate Leases Not Directly Accessible from Public Rights-of-Way, Alternative 6—Negotiate Access Easements on Private Property for Existing Leases, Alternative 7—Amend Leases to Allow Vegetation Management, and Alternative 8—Form a Citizens' Committee to Provide Lease Management Support.

In May 2024, the USIBWC prepared a Final EA and FONSI and determined that one or any combination of Alternatives 2 through 8 could be implemented to manage the grazing lease program at the Falcon Project. Details of the implementation of alternatives to manage the grazing lease program would be determined by the USIBWC Realty Division. All active leases would not be terminated simultaneously. The entire lease program would not be terminated. Grazing Lease actions could include termination of any leases, change of rental rates on active leases, hunting on existing leases, terminate non-accessible leases, allow vegetation management, and form a citizen's committee.

Potential impacts on natural, cultural, and other resources were evaluated. A Finding of No Significant Impact for one or any combination of Alternatives 2 through 8 has been prepared and signed based on a review of the facts and analyses contained in the EA. An environmental impact statement will not be prepared unless additional information which may affect this decision is brought to our attention within 30 days from the date of this Notice.
