

TSCA section 6(b)(1)(B) and 40 CFR 702.3. As mentioned previously, a proposed designation of a chemical substance as a High-Priority Substance is not a finding of unreasonable risk. Rather, when prioritization is complete, a final designation as a High-Priority Substance will initiate the risk evaluation for the chemical substance, which will culminate in a finding of whether the chemical substance presents an unreasonable risk to health or the environment under the conditions of use. Based on the information provided in the proposed designation documents, the Agency is proposing these five chemical substances as High-Priority Substances for risk evaluation. In each chemical substance's docket, EPA has included the chemical-specific designation document containing the information, analysis, and basis used to support the proposed designation.

V. Request for Comment
