**SUPPLEMENTARY INFORMATION:**

**Authority**

Chapters 73 and 74 of 38 U.S.C. and 38 U.S.C. 303 authorize the Secretary to regulate VA health care professions to make certain that VA’s health care system provides safe and effective health care by qualified health care professionals to ensure the well-being of those Veterans who have borne the battle.

On November 12, 2020, VA published an interim final rule confirming that VA health care professionals may practice their health care profession consistent with the scope and requirements of their VA employment, notwithstanding any State license, registration, certification, or other requirements that unduly interfere with their practice. 38 CFR 17.419; 85 FR 71838. Specifically, this rulemaking confirmed VA’s current practice of permitting VA health care professionals to deliver health care services in a State other than the health care professional’s State of licensure, registration, certification, or other requirement, thereby enhancing beneficiaries’ access to critical VA health care services. The rulemaking also confirmed VA’s authority to establish national standards of practice for its health care professionals, which would standardize a health care professional’s practice in all VA medical facilities, regardless of conflicting State laws, rules, regulations, or other requirements.

The rulemaking explained that a national standard of practice describes the tasks and duties that a VA health care professional practicing in the health care profession may perform and may be permitted to undertake. Having
