These recordkeeping requirements are contained in section 5 of Regulation GG. Policies and procedures reasonably designed to identify and block, or otherwise prevent or prohibit, restricted transactions are necessary because Congress found that internet gambling is primarily funded through personal use of payment system instruments, credit cards, and wire transfers.

Estimated Total Annual Burden: 5,880 hours.

I. General Description of Report

This information collection is required pursuant to sections 7 and 13 of the International Banking Act (12 U.S.C. 3105 and 3108) for the Board, sections 7 and 10 of the Federal Deposit Insurance Act (12 U.S.C. 1817 and 1820) for the FDIC, and the National Bank Act (12 U.S.C. 161) as applied through section 4 of the International Banking Act (12 U.S.C. 3102) for the OCC. The FFIEC 019 is given confidential treatment consistent with 5 U.S.C. 552(b)(4) and (b)(8).

The FFIEC 019 report must be filed by each U.S. branch or agency of a foreign bank that has total direct claims on foreign residents in excess of \$30 million. The branch or agency reports its total exposure (1) to residents of its

home country, and (2) to the other five foreign nations to which its exposure is largest and is at least \$20 million. The home country exposure must be reported regardless of the size of the total claims for that nation.

Each respondent must report by country, as appropriate, the information on its direct claims (assets such as deposit balances with banks, loans, or securities), indirect claims (which include guarantees), and total adjusted claims on foreign residents, as well as information on commitments. The respondent also must report information on claims on related non-U.S. offices that are included in total adjusted claims on the home country, as well as a breakdown for the home country and each other reported country of adjusted claims on unrelated foreign residents by the sector of borrower or guarantor, and by maturity (in two categories: one year or less, and over one year). The Board collects and processes this report on behalf of all three agencies.

II. Current Actions

On March 4, 2024, the Board published a notice in the **Federal Register** (89 FR 15575) requesting comment for 60 days on a proposal to extend for three years, without revision, the FFIEC 019. The comment period for the proposal ended on May 3, 2024, and no comments were received.

III. Request for Comment

Public comment is requested on all aspects of this notice. Comment is also specifically invited on:

a. Whether the information collection is necessary for the proper performance of the agencies' functions, including whether the information has practical utility;

b. The accuracy of the agencies' estimate of the burden of the information collection, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or start up costs and costs of operation, maintenance, and purchase of services to provide information.

Comments submitted to the Board in response to this notice will be shared with the other agencies. All comments will become a matter of public record.

SUPPLEMENTARY INFORMATION:

Background

Section 436(h) of the Energy Independence and Security Act of 2007 (EISA) requires GSA to evaluate green building certification systems and provide a recommendation to the Secretary of Energy who, in consultation with the Department of Defense and GSA, formally identifies system(s) to be used across the Federal Government. GSA's Office of Federal High-Performance Green Buildings has just completed and published its 2024 Green Building Certification System Review Findings Report (Findings Report), which can be accessed at <https://www.gsa.gov/gbcertificationreview>. This report summarizes GSA's formal review of six green building certification systems (BOMA BEST, BREEAM, Green Globes, LEED, Living Building Challenge, and Passive House US, Inc). These systems were assessed against a set of review criteria contained in statute that evaluate how they were developed and how the systems align with current Federal green building performance requirements.

Request for Public Comment: GSA is seeking public comment on its draft recommendations to the Secretary of Energy on those green building certification systems that "will most likely encourage a comprehensive and environmentally sound approach" to the certification of high-performance green Federal buildings. GSA's draft recommendations can be found on its website: <https://www.gsa.gov/gbcertificationreview>.

Draft Recommendations

Based on the information contained in its Findings Report, GSA recommends that agencies consider using LEED or Green Globes for new construction or major renovation projects. Both of these systems meet the basic requirements established under DOE Rule: "Green Building Certification Systems Requirement for New Federal Buildings
