The proposed articles and services will continue modernization of the Jordanian fighter aircraft fleet and support operational requirements associated with regional U.S.-coalition goals such as countering violent extremist organizations, countering malign state and non-state actors, and border defense, while ensuring continued interoperability with U.S. and coalition forces.

The AIM-9X Block II Sidewinder Missile is a short-range, air-to-air missile providing a high off-boresight seeker, enhanced countermeasure rejection capability, low drag/high angle of attack airframe, and the ability to integrate a Helmet Mounted Cueing System.

This potential sale will include tactical guidance units, Captive Air Training Missiles (CATMs), and CATM guidance units.

The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.
