**Notice of Inventory Completion:
Wesleyan University, Middletown, CT**

AGENCY: National Park Service, Interior.

DATES: Upon request, repatriation of the human remains in this notice may occur on or after September 11, 2024.

ADDRESSES: Wendi Field Murray, Wesleyan University (Archaeology & Anthropology Collections), Exley Science Building, 265 Church Street, Middletown, CT 06459, telephone (860) 685-2085, email wmurray01@wesleyan.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of Wesleyan University, and additional information on the determinations in this notice, including the results of consultation, can be found in its inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Human remains representing, at least, 16 individuals have been identified. No associated funerary objects are present. The remains of these 16 individuals were once part of an osteological teaching collection, which included human skeletal elements that had been prepared and used for anatomical instruction sometime between the 19th and 20th centuries. In August 2013, any human remains in the osteological teaching collection that showed evidence of having been disinterred (visible soil/staining, water damage, and weathering) rather than mechanically cleaned/prepared by a medical supply vendor or other entity were presumed to be Native American. Wesleyan has no records suggesting their geographic origin or acquisition history.

The presence of potentially hazardous substances (*i.e.*, pesticide residues) on these remains is unknown. In 2021, Wesleyan University discovered the presence of pesticide residue (arsenic) on one organic object from Samoa that was transferred from the Smithsonian in the 19th century, as well as several taxidermy specimens. While pesticides were not typically applied to human skeletal remains, they were managed together with organic objects in a large
