Abstract: EPA’s Pollution Prevention (P2) Program is a voluntary program that encourages businesses/facilities to adopt P2 projects that reduces both financial costs (waste management and cleanup) and environmental costs (health problems and environmental damage). In passing the Pollution Prevention Act (PPA) in 1990, Congress found that “(T)here are significant opportunities for industry to reduce or prevent pollution at the source through cost-effective changes in production, operation, and raw materials use. Such changes offer industry substantial savings in reduced raw material, pollution control, and liability costs as well as help protect the environment and reduce risks to worker health and safety.” 42 U.S.C. 13101(a)(2). Furthermore, the PPA states the Administrator shall “establish an annual award program to recognize a company or companies which operate outstanding or innovative source reduction programs” (PPA section 6604)

42 U.S.C. 13103(b)(13). The EPA P2 Recognition Program is an annual, voluntary, and non-monetary program that will recognize companies that demonstrate leadership in innovative P2 practices and encourage other entities to consider P2 approaches. This ICR may be applicable to HQ, as well as any of the 10 Regional Offices that choose to participate and implement a P2 Recognition Program.

Form Numbers: EPA P2 Award Program Application—5800–005.

Respondents/affected entities: Various types of businesses, companies, organizations, both for-profit and non-profit, from all North American Industry Classification System (NAICS) codes. However, businesses need to be from a state or tribe in an EPA Region implementing this recognition program.

Respondent’s obligation to respond: Voluntary.

Estimated number of respondents: 42 (total).

Frequency of response: Annually.

Total estimated burden: 458 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$33,012.84 (per year), which includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is a decrease of 517 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to adjustments to the estimates and receiving input from respondents over the past three years. The original consultations were with state recognition programs, which are more rigorous than the regional P2 award program. Regions who are currently implementing Regional P2 Programs, consulted with applicants who provided an average estimate of 10.9 hours to respond to questions in the application. Based off these consultations we are decreasing the respondent burden by 8.6 hours per respondent.

Courtney Kerwin,

Director, Regulatory Support Division.
