Abstract of Information Available

Based on the information available, human remains representing, at least, one individual removed from CA-TEH-1528 in Tehama County, California, have been reasonably identified. The lot of 8,707 associated funerary objects removed from CA-TEH-1528 are groundstone tools, ocher, unmodified shell, faunal bone, modified faunal bone, flaked stone tools and debitage. Based on records concerning the associated funerary objects and the institution in which they were housed, there is no evidence of the human remains or associated funerary items being treated with hazardous substances.

CA-TEH-1528 is located at the edge of a broad basaltic plateau northeast of Red Bluff and west-northwest of Vales in Tehama County. CA-TEH-1528 was first recorded by Pat Mikkelsen in 1992. The collection is the result of Stage II and III archaeological investigations at the PGT-PGE Pipeline Project by Far Western Anthropological Research Group. The collection, Accession Number 91-31, has been housed at Sonoma State University since 1995.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the geographical location or acquisition history of the human remains and associated funerary objects described in this notice.

Determinations

The Sonoma State University has determined that:

- The human remains described in this notice represent the physical remains of one individual of Native American ancestry.
- The 8,707 objects described in this notice are reasonably believed to have been placed intentionally with or near individual human remains at the time of death or later as part of the death rite or ceremony.

- There is a connection between the human remains and associated funerary objects described in this notice and the Paskenta Band of Nomlaki Indians of California.
