

national security, law enforcement, foreign policy, and trade policy issues as well as other changes.

In the 2020 Executive Branch Review Order, the Commission adopted rules and procedures to facilitate a more streamlined and transparent review process for coordinating applications with the Executive Branch agencies. The Commission also established firm time frames for the Executive Branch agencies to complete their review consistent with Executive Order 13913, which established the Committee for the Assessment of Foreign Participation in the United States Telecommunications Services Sector (the Committee). Specifically, under the new rules, the Committee has 120 days for initial review, plus an additional 90 days for secondary assessment if the Committee determines that the risk to national security or law enforcement interests cannot be mitigated with standard mitigation measures. The Commission also adopted and codified five categories of information for which applicants must provide detailed and comprehensive information to the Committee.

In the 2021 Executive Branch Second Order, the Commission adopted the Standard Questions—a baseline set of national security and law enforcement questions covering the five categories of information described above. The responses to the Standard Questions will replace the information that applicants currently provide to the Committee on an individualized basis. The Standard Questions consist of six separate questionnaires (based on subject matter) and a supplement for the provision of personally identifiable information (PII). Petitioners will be required to submit their responses to the Standard Questions and a copy of the section 310(b) petition, directly with the Committee. Broadcast petitioners will be required to answer Standard Questions specific to broadcast licensees and common carrier wireless petitioners will be required to answer Standard Questions specific to common carrier licenses as well as a general PII supplement applicable to all respondents to the Standard Questions. Federal Communications Commission.

Marlene Dortch,
Secretary.

BILLING CODE 6712–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 635

[Docket No. 220919–0193; RTID 0648–XE181]

Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Fisheries; Closure of the General Category June Through August Fishery for 2024

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS closes the General category fishery for Atlantic bluefin tuna (BFT) for the remainder of the June through August time period. The General category may only retain, possess, or land large medium and giant (*i.e.*, measuring 73 inches (185 centimeters (cm)) curved fork length (CFL) or greater) BFT when open. This action applies to Atlantic Tunas General category (commercial) permitted vessels and Atlantic highly migratory species (HMS) Charter/Headboat permitted vessels with a commercial sale endorsement when fishing commercially for BFT. This action also waives the previously scheduled restricted-fishing days (RFDs) for the remainder of the June through August time period. With the RFDs waived during the closure, fishermen aboard General category permitted vessels and HMS Charter/Headboat permitted vessels may tag and release BFT of all sizes, subject to the requirements of the catch-and-release and tag-and-release programs. On September 1, 2024, the fishery will reopen automatically and previously-scheduled RFDs for September will resume.

DATES: Effective 11:30 p.m., local time, August 22, 2024, through August 31, 2024.

FOR FURTHER INFORMATION CONTACT: Larry Redd, Jr., larry.redd@noaa.gov, or Ann Williamson, ann.williamson@noaa.gov, 301–427–8503.

SUPPLEMENTARY INFORMATION: Atlantic BFT fisheries are managed under the 2006 Consolidated HMS Fishery Management Plan (FMP) and its amendments, pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*) and consistent with the Atlantic Tunas Convention Act (ATCA; 16 U.S.C. 971 *et seq.*). HMS implementing

regulations are at 50 CFR part 635. Section 635.27(a) divides the U.S. BFT quota, established by the International Commission for the Conservation of Atlantic Tunas (ICCAT) and as implemented by the United States among the various domestic fishing categories, per the allocations established in the 2006 Consolidated HMS FMP and its amendments. NMFS is required under the Magnuson-Stevens Act at 16 U.S.C. 1854(g)(1)(D) to provide U.S. fishing vessels with a reasonable opportunity to harvest quotas under relevant international fishery agreements such as the ICCAT Convention, which is implemented domestically pursuant to ATCA.

Under § 635.28(a)(1), NMFS files a closure action with the Office of the Federal Register for publication when a BFT quota (or subquota) is reached or is projected to be reached. Retaining, possessing, or landing BFT under that quota category is prohibited on or after the effective date and time of a closure action for that category until the opening of the relevant subsequent quota period or until such date as specified.

As described in § 635.27(a), the current baseline U.S. BFT quota is 1,316.14 metric tons (mt) (not including the 25 mt ICCAT allocated to the United States to account for bycatch of BFT in pelagic longline fisheries in the Northeast Distant Gear Restricted Area per § 635.27(a)(3)). The General category baseline quota is 710.7 mt. The General category baseline quota is suballocated to time periods. Relevant to this action, the baseline subquota for the June through August time period is 355.4 mt.

Closure of the June Through August 2024 BFT General Category Fishery

To date, reported landings for the BFT General category June through August time period total 316.1 mt. Based on these landings data, as well as average catch rates and anticipated fishing conditions, NMFS has determined that the adjusted June through August time period subquota of 355.4 mt is projected to be reached and exceeded shortly. Therefore, retaining, possessing, or landing large medium or giant (*i.e.*, measuring 73 inches (185 cm) CFL or greater) BFT by persons aboard vessels permitted in the Atlantic Tunas General category and HMS Charter/Headboat permitted vessels (while fishing commercially) must cease at 11:30 p.m. local time on August 22, 2024. The BFT General category will automatically reopen September 1, 2024, for the September time period. This action applies to Atlantic Tunas General category (commercial) permitted vessels

and HMS Charter/Headboat permitted vessels with a commercial sale endorsement when fishing commercially for BFT and is taken consistent with the regulations at § 635.28(a)(1).

Waiver for Remaining June Through August RFDs

On May 31, 2024 (89 FR 47095), NMFS published a final rule, which among other things, implemented RFDs every Sunday, Tuesday, Friday, and Saturday from July 1 through November 30, 2024. Since the fishery will be closed for the remainder of the June through August time period, NMFS has decided to waive the previously-scheduled RFDs for the remainder of that time period. Previously-scheduled RFDs (*i.e.*, every Sunday, Tuesday, Friday, and Saturday) will resume on September 1, 2024.

With the RFDs waived during a closure, consistent with § 635.23(a)(7) fishermen aboard General category permitted vessels and HMS Charter/Headboat permitted vessels may tag and release BFT of all sizes, subject to the requirements of the catch-and-release and tag-and-release programs at § 635.26. All BFT that are released must be handled in a manner that will maximize their survival, and without removing the fish from the water, consistent with requirements at § 635.21(a)(1). For additional information on safe handling, see the “Careful Catch and Release” brochure available at <https://www.fisheries.noaa.gov/resource/outreach-and-education/careful-catch-and-release-brochure/>.

Monitoring and Reporting

NMFS will continue to monitor the BFT fisheries closely. Per § 635.5(b)(2)(i)(A), dealers are required to submit landing reports within 24 hours of a dealer receiving BFT. Late reporting by dealers compromises NMFS’ ability to timely implement actions such as quota and retention limit adjustments, as well as closures, and may result in enforcement actions. Additionally, and separate from the dealer reporting requirement, General and HMS Charter/Headboat category vessel owners are required per § 635.5(a)(4) to report their own catch of all BFT retained or discarded dead within 24 hours of the landing(s) or end of each trip, by accessing <https://hmspermits.noaa.gov>, using the HMS Catch Reporting app, or calling 888-872-8862 (Monday through Friday from 8 a.m. until 4:30 p.m.).

After the fishery reopens on September 1, depending on the level of

fishing effort and catch rates of BFT, NMFS may determine that additional adjustments are necessary to ensure available subquotas are not exceeded or to enhance scientific data collection from, and fishing opportunities in, all geographic areas as specified under § 635.27(a)(7). If needed, subsequent adjustments will be published in the **Federal Register**. In addition, fishermen may access <https://hmspermits.noaa.gov>, for updates on quota monitoring and inseason adjustments.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act (16 U.S.C. 1855(d)) and regulations at 50 CFR part 635 and this action is exempt from review under Executive Order 12866.

The Assistant Administrator for NMFS (AA) finds that pursuant to 5 U.S.C. 553(b)(B), it is impracticable and contrary to the public interest to provide prior notice of, and an opportunity for public comment on this action, for the following reasons. Specifically, the regulations implementing the 2006 Consolidated HMS FMP and amendments provide for inseason retention limit adjustments and fishery closures to respond to the unpredictable nature of BFT availability on the fishing grounds, the migratory nature of this species, and the regional variations in the BFT fishery. Providing for prior notice and an opportunity to comment is impracticable and contrary to the public interest as this fishery is currently underway and, based on the most recent landings information, the available time period subquota is projected to be reached shortly. Delaying this action could result in BFT landings that exceed the June through August time period subquota, which may result in future potential quota reductions for other BFT categories, depending on the magnitude of a potential overharvest. Taking this action does not raise conservation and management concerns and would support effective management of the BFT fishery. NMFS notes that the public had an opportunity to comment on the underlying rulemakings that established the U.S. BFT quota and the inseason adjustment and closure criteria.

For all of the above reasons, the AA also finds that pursuant to 5 U.S.C. 553(d), there is good cause to waive the 30-day delay in effective date.

Authority: 16 U.S.C. 971 *et seq.* and 1801 *et seq.*

Dated: August 20, 2024.

Kelly Denit,

Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 679

[Docket No. 240227-0061; RTID 0648-XE061]

Fisheries of the Exclusive Economic Zone Off Alaska; Pacific Cod by Catcher/Processors Using Trawl Gear in the Central Regulatory Area of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is prohibiting retention of Pacific cod by catcher/processors using trawl gear in the Central Regulatory Area of the Gulf of Alaska (GOA). This action is necessary because the 2024 total allowable catch of Pacific cod allocated to catcher/processors using trawl gear in the Central Regulatory Area of the GOA has been reached.

DATES: Effective 1200 hours, Alaska local time (A.l.t.), August 20, 2024, through 2400 hours, A.l.t., December 31, 2024.

FOR FURTHER INFORMATION CONTACT: Krista Milani, 907-581-2062.

SUPPLEMENTARY INFORMATION: NMFS manages the groundfish fishery in the GOA exclusive economic zone according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). Regulations governing fishing by U.S. vessels in accordance with the FMP appear at subpart H of 50 CFR parts 600 and 679.

The 2024 total allowable catch (TAC) of Pacific cod allocated to catcher/processors using trawl gear in the Central Regulatory Area of the GOA is 635 metric tons as established by the final 2024 and 2025 harvest specifications for groundfish of the GOA (89 FR 15484, March 4, 2024).

In accordance with § 679.20(d)(2), the Administrator, Alaska Region, NMFS
