

Grantees of the Legal Assistance for Victims Grant Program.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* 1122-0007.

Affected public who will be asked or required to respond, as well as the obligation to respond: The affected public includes the approximately 200 grantees of the LAV Program whose eligibility is determined by statute. The LAV Program awards grants to law school legal clinics, legal aid or legal services programs, domestic violence victims shelters, bar associations, sexual assault programs, private nonprofit entities, and Indian tribal governments. The obligation to respond is required to obtain/retain a benefit.

4. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* It is estimated that it will take the approximately 200 respondents (LAV Program grantees) approximately one hour to complete a semi-annual progress report. The semi-annual progress report is divided into sections that pertain to the different types of activities in which grantees may engage. An LAV Program grantee will only be required to complete the sections of the form that pertain to its own specific activities.

5. *An estimate of the total annual burden (in hours) associated with the collection:* It is estimated that it will take the approximately 200 respondents (LAV Program grantees) approximately one hour to complete a semi-annual

progress report. The semi-annual progress report is divided into sections that pertain to the different types of activities in which grantees may engage. An LAV grantee will only be required to complete the sections of the form that pertain to its own specific activities.

6. The total annual hour burden to complete the data collection forms is 400 hours, that is 200 grantees completing a form twice a year with an estimated completion time for the form being one hour.

7. *An estimate of the total annual cost burden associated with the collection, if applicable:* The annualized costs to the Federal Government resulting from the OVW staff review of the progress reports submitted by grantees are estimated to be \$22,400.

8.

TOTAL BURDEN HOURS

Activity	Number of respondents	Frequency	Total annual responses	Time per response (hour)	Total annual burden (hours)
Progress Report Form	200	2/semiannually	400	1	400
Unduplicated Totals	200	400	400

If additional information is required, contact: Darwin Arceo, Department Clearance Officer, Policy and Planning Staff, Justice Management Division, United States Department of Justice, Two Constitution Square, 145 N Street NE, 4W-218, Washington, DC 20530.

Dated: August 21, 2024.

Darwin Arceo,

Department Clearance Officer for PRA, U.S. Department of Justice.

BILLING CODE 4410-FX-P

DATES: The OMB will consider all written comments that the agency receives on or before September 26, 2024.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: Nicole Bouchet by telephone at 202-693-0213, or by email at DOL_PRA_PUBLIC@dol.gov.

SUPPLEMENTARY INFORMATION: The purpose of this standard and its information collection requirements is to provide protection for workers from the adverse effects associated with occupational exposure to vinyl chloride. Employers must monitor worker exposure, reduce worker exposure to permissible exposure limits, and provide medical examinations and other information to workers pertaining to vinyl chloride. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on May 22, 2024 (89 FR 45025).

Comments are invited on: (1) whether the collection of information is

necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) the accuracy of the agency’s estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs

DEPARTMENT OF LABOR

Mine Safety and Health Administration

Petition for Modification of Application of Existing Mandatory Safety Standard

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of a petition for modification submitted to the Mine Safety and Health Administration (MSHA) by the party listed below.

DATES: All comments on the petition must be received by MSHA’s Office of Standards, Regulations, and Variances on or before September 26, 2024.

ADDRESSES: You may submit comments identified by Docket No. MSHA–2024–0025 by any of the following methods:

1. *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments for MSHA–2024–0025.

2. *Fax:* 202–693–9441.

3. *Email:* petitioncomments@dol.gov.

4. *Regular Mail or Hand Delivery:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, 4th Floor West, Arlington, Virginia 22202–5452.

Attention: S. Aromie Noe, Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at 4th Floor West. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above. Before visiting MSHA in person, call 202–693–9455 to make an appointment, in keeping with the Department of Labor’s COVID–19

policy. Special health precautions may be required.

FOR FURTHER INFORMATION CONTACT: S. Aromie Noe, Office of Standards, Regulations, and Variances at 202–693–9440 (voice), Petitionsformodification@dol.gov (email), or 202–693–9441 (fax). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and title 30 of the Code of Federal Regulations (CFR) part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, sections 44.10 and 44.11 of 30 CFR establish the requirements for filing petitions for modification.

II. Petition for Modification

Docket Number: M–2024–011–C.

Petitioner: Fossil Rock Resources, LLC, 5125 North Cottonwood Road, Orangeville, Utah 84537.

Mine: Fossil Rock Mine, MSHA ID No. 42–01211, located in Emery County, Utah.

Regulation Affected: 30 CFR 75.1002(a) (Permissible electric equipment).

Modification Request: The petitioner requests a modification of 30 CFR 75.1002(a) to permit the use of non-permissible battery powered electronic surveying equipment within 150 feet of pillar workings or longwall faces.

The petitioner states that:

(a) In order to comply with requirements of 30 CFR 75.372 and 30 CFR 75.1200, use of the most practical and accurate surveying equipment is necessary.

(b) Mechanical surveying equipment has been obsolete for a number of years. Such equipment of acceptable quality is not commercially available. It is difficult, if not impossible, to have such equipment serviced or repaired. Electronic surveying equipment is, at a

minimum, 8–10 times more accurate than mechanical equipment. Fossil Rock mines utilize the continuous miner and longwall methods of mining. Accurate surveying is critical to the safety of the miners at the Fossil Rock Mine.

(c) Underground mining by its nature, size and complexity of mine plans requires that accurate and precise measurements be completed in a prompt and efficient manner. Use of electronic surveying equipment provides significant safety benefits.

The petitioner proposes the following alternative method:

(a) Non-permissible battery powered electronic surveying equipment to be used include:

(1) Sokkia IM–52–2, IP 66, LI–ON 7.2V, 2993mAh and 21.54 Wh;

(2) An equivalent instrument may be used with the approval of the District Manager.

(b) The equipment used is low voltage or battery-powered non-permissible total stations and theodolites. All non-permissible electronic total stations and theodolites shall have an ingress protection (IP) 66 or greater rating.

(c) The operator shall maintain a logbook for electronic surveying equipment with the equipment, or in the location where mine record books are kept or in the location where the surveying record books are kept. The logbook shall contain the date of manufacture and/or purchase of each piece of electronic surveying equipment. The logbook shall be made available to MSHA upon request.

(d) All non-permissible electronic surveying equipment located within 150 feet of pillar workings or longwall faces shall be examined by the person to operate the equipment prior to taking the equipment underground to ensure the equipment is being maintained in safe operating condition. These examinations shall include:

(1) Checking the instrument for any physical damage and the integrity of the case;

(2) Removing the battery and inspecting for corrosion;

(3) Inspecting the contact points to ensure a secure connection to the battery;

(4) Reinserting the battery and powering up and shutting down to ensure proper connections; and

(5) Checking the battery compartment cover or battery attachment to ensure that is securely fastened.

The results of this examination shall be recorded in the logbook.

(e) The equipment shall be examined at least weekly by a qualified person as defined in 30 CFR 75.153. The examination results shall be recorded
