SUPPLEMENTARY INFORMATION: In general, Title 49 United States Code (U.S.C.) section 20157(h) requires FRA to certify that a host railroad's PTC system complies with Title 49 Code of Federal Regulations (CFR) part 236, subpart I, before the technology may be operated in revenue service. Before making certain changes to an FRA-certified PTC system or the associated FRA-approved PTC Safety Plan (PTCSP), a host railroad must submit, and obtain FRA's approval of, an RFA to its PTC system or PTCSP under 49 CFR 236.1021.

Under 49 CFR 236.1021(e), FRA's regulations provide that FRA will publish a notice in the **Federal Register** and invite public comment in accordance with 49 CFR part 211, if an RFA includes a request for approval of a material modification of a signal or train control system. Accordingly, this notice informs the public that, on August 15, 2024, Amtrak submitted an RFA to its ACSES II PTC system, which seeks FRA's approval of a temporary outage of ACSES II to support the addition of the Leggett Interlocking on the NYS line, Harold to Control Point 216. That RFA is available in Docket No. FRA-2010-0029.

Interested parties are invited to comment on Amtrak's RFA by submitting written comments or data. During FRA's review of this railroad's RFA, FRA will consider any comments or data submitted within the timeline specified in this notice and to the extent practicable, without delaying

implementation of valuable or necessary modifications to a PTC system. See 49 CFR 236.1021; see also 49 CFR 236.1011(e). Under 49 CFR 236.1021, FRA maintains the authority to approve, approve with conditions, or deny a railroad's RFA at FRA's sole discretion.

SUPPLEMENTARY INFORMATION: On July 31, 2024, NHTSA issued a Supplemental Initial Decision That Certain Frontal Driver and Passenger Air Bag Inflators Manufactured by ARC Automotive Inc. and Delphi Automotive Systems LLC, and Vehicles in Which Those Inflators Were Installed, Contain a Safety Defect pursuant to 49 U.S.C. 30118(a) and 49 CFR 554.10. 89 FR 63473 (Aug. 5, 2024). More specifically, NHTSA confirmed its initial decision of September 5, 2023, at 88 FR 62140, that certain air bag inflators manufactured by ARC Automotive Inc. (ARC) and Delphi Automotive Systems LLC (Delphi) may rupture when the vehicle's air bag is commanded to deploy, causing metal debris to be forcefully ejected into the passenger compartment of the vehicle, and that these rupturing air bag inflators pose an unreasonable risk of serious injury or death to vehicle occupants. In accordance with 49 U.S.C. 30118(b)(1) and 49 CFR 554.10(c)(4), the Supplemental Initial Decision provided manufacturers and any interested

person an opportunity to present information, views, and arguments in response to the Supplemental Initial Decision by submitting written information to the Agency. The deadline for written submissions in response to the Supplemental Initial Decision was September 4, 2024.

Written Submission Deadline Extension Request

On August 7, 2024, NHTSA received a request from counsel representing certain unspecified motor vehicle and motor vehicle equipment manufacturers asking NHTSA to extend the period for written submissions by 30 days. The request claimed that, to meaningfully respond, the manufacturers needed more time to adequately review the Supplemental Initial Decision and related materials and prepare their analyses. A copy of the extension request and NHTSA's response will be added to the public docket.

Extension of Written Submission Deadline

After consideration of the request, NHTSA has granted the requested 30-day extension of the deadline to provide written submissions. The prior deadline of September 4, 2024 has been extended, and written submissions from any interested person are now due before the close of business on October 4, 2024.
