

and repair parts, tools and test equipment, support equipment, repair and return support, personnel training and training equipment, publications and technical documentation, U.S. Government and contractor engineering and logistics support services, and other related elements of logistic and program support. The estimated total cost was \$860.4 million. Major Defense Equipment (MDE) constituted \$324.4 million of this total.

On June 15, 2020, Congress was notified by Congressional certification transmittal number 20–0G of an additional MDE sale of thirty (30) All-Up-Round MK 54 Lightweight Torpedoes (LWT). The following non-MDE items were also be included: MK 54 LWT expendables; MK 54 turnaround kits; MK 54 containers; one (1) MK–695 Torpedo Systems Test Set (TSTS); support equipment including fire control modification platforms and spare parts; torpedo spare parts; training; publications; software; U.S. Government and contractor engineering, technical, and logistics support services and other related elements of logistics and program support. The addition of these items resulted in a net increase in MDE cost of \$45 million, resulting in a revised MDE cost of \$369.4 million. The total estimated case value increased to \$940.4 million.

On June 8, 2022, Congress was notified by Congressional certification transmittal number 22–0G of the MDE replacement of the previously notified two (2) All Up Round MK 54 Mod 0 LWTs with two (2) Exercise MK 54 Mod 0 LWTs. Also included was additional Engineering Technical Assistance for redesign of Radar Signal Processing Group configuration and updates to

International Aegis Fire Control Loop design; shipsets of SAASM units and associated spares; COMSEC equipment for use between test sites; and removal of one (1) shipset MK 36 Mod 6 Decoy Launching System. The MDE total value remained \$369.4 million; however, the non-MDE estimated value increased from \$571 million to \$810.6 million. The total estimated case value increased to \$1.18 billion.

This transmittal notifies the MDE inclusion of up to an additional sixty-two (62) SM–2 Block IIIB missiles in tactical and telemetered configurations. Also included are MK 13 canisters; spare parts and associated containers; personal training and training equipment; publications and technical data; U.S. Government and contractor technical assistance; and other related elements of logistics and program support. The addition of these items will result in a net increase in MDE value of \$260 million, resulting in a revised MDE value of \$629.4 million. The non-MDE estimated value will increase from \$810.6 million to \$850.6 million. The total estimated case value will increase by \$300 million to \$1.48 billion.

(iv) *Significance*: The proposed articles and services will support Spain’s capability to commission its new F–110 frigates with the AEGIS Weapon System (AWS).

(v) *Justification*: This proposed sale will support the foreign policy and national security of the United States by improving the security of a NATO ally which is an important force for political stability and economic progress in Europe. It is vital to the U.S. national interest to assist Spain in developing

and maintaining a strong and ready self-defense capability.

(vi) *Sensitivity of Technology*: The Sensitivity of Technology Statement contained in the original notification applies to items reported here.

(vii) *Date Report Delivered to Congress*: February 27, 2023

Arms Sales Notification

AGENCY: Defense Security Cooperation Agency, Department of Defense (DoD).

ACTION: Arms sales notice.

SUMMARY: The DoD is publishing the unclassified text of an arms sales notification.

FOR FURTHER INFORMATION CONTACT: Neil Hedlund at neil.g.hedlund.civ@mail.mil or (703) 697–9214.

SUPPLEMENTARY INFORMATION: This 36(b)(1) arms sales notification is published to fulfill the requirements of section 155 of Public Law 104–164 dated July 21, 1996. The following is a copy of a letter to the Speaker of the House of Representatives with attached Transmittal 23–08, Policy Justification, and Sensitivity of Technology.

Dated: August 23, 2024.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

 Washington, DC 20515

Dear Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 23-08, concerning the Army's proposed Letter(s) of Offer and Acceptance to the Government of the Netherlands for defense articles and services estimated to cost \$670 million. We will issue a news release to notify the public of this proposed sale upon delivery of this letter to your office.

Sincerely,

James A. Hursch
 Director

3. Sensitivity of Technology

BILLING CODE 6001-FR-C

Transmittal No. 23-08

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* The Government of the Netherlands

(ii) *Total Estimated Value:*

Major Defense Equipment *	\$520 million
Other	\$150 million
TOTAL	\$670 million

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:*

Major Defense Equipment (MDE):

Twenty (20) M142 High Mobility Artillery Rocket System (HIMARS) Launchers
 Thirty-nine (39) M30A2 Guided Multiple Launch Rocket System (GMLRS) Alternative Warhead (AW) Missile Pods with Insensitive Munitions Propulsion System (IMPS)

Thirty-eight (38) M31A2 GMLRS Unitary (GMLRS-U) High Explosive (HE) Missile Pods with IMPS
 Eighty (80) M57 Army Tactical Missile System (ATACMS) Missile Pods
 Seventeen (17) M1152A1 High Mobility Multipurpose Wheeled Vehicles (HMMWVs)

Non-MDE:

Also included are M28A2 Reduced Range Practice Rocket (RRPR) pods; radios with similar "SINGARS"

capability, including vehicular dual long-range radio systems w/GPS; single radio, long range vehicular system w/GPS; High Frequency/VHF radios; M1084A2 cargo trucks, Family of Medium Tactical Vehicles (FMTVs) Resupply Vehicles (RSVs); M1089A2 wrecker truck, FMTVs; M1095 5-ton trailer FMTVs; Simple Key Loaders (SKLs), AN/PYQ-10; Defense Advanced Global Positioning System Receivers (DAGRs); machine gun mounts; battle management systems, Vehicle Integration Kits, ruggedized laptops, and training equipment publications for HIMARS and munitions; camouflage screen and support systems; support equipment; communications equipment; spare and repair parts; test sets; training and training equipment; publications; systems integration support; technical data; Stockpile Reliability, Quality Assurance and Technical Assistance teams; U.S. Government and contractor technical, engineering, and logistics support services; and other related elements of logistical and program support.

(iv) *Military Department*: Army (NE-B-YAX)

(v) *Prior Related Cases, if any*: NE-B-PBM

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid*: None known at this time

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold*: See Attached Annex

(viii) *Date Report Delivered to Congress*: February 16, 2023

* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

The Netherlands—M142 High Mobility Artillery Rocket System (HIMARS)

The Government of the Netherlands has requested to buy twenty (20) M142 High Mobility Artillery Rocket System (HIMARS) launchers; thirty-nine (39) M30A2 Guided Multiple Launch Rocket System (GMLRS) Alternative Warhead (AW) Missile Pods with Insensitive Munitions Propulsion System (IMPS); thirty-eight (38) M31A2 GMLRS Unitary (GMLRS-U) High Explosive (HE) Missile Pods with IMPS; eighty (80) M57 Army Tactical Missile System (ATACMS) Missile Pods; and seventeen (17) M1152A1 High Mobility Multipurpose Wheeled Vehicles (HMMWVs). Also included are M28A2 Reduced Range Practice Rocket (RRPR)

pod; radios with similar “SINGARS” capability, including vehicular dual long-range radio systems w/GPS; single radio, long range vehicular system w/GPS; High Frequency/VHF radios; M1084A2 cargo trucks, Family of Medium Tactical Vehicles (FMTVs) Resupply Vehicles (RSVs); M1089A2 wrecker truck, FMTVs; M1095 5-ton trailer FMTVs; Simple Key Loaders (SKLs), AN/PYQ-10; Defense Advanced Global Positioning System Receivers (DAGRs); machine gun mounts; battle management systems, Vehicle Integration Kits, ruggedized laptops, and training equipment publications for HIMARS and munitions; camouflage screen and support systems; support equipment; communications equipment; spare and repair parts; test sets; training and training equipment; publications; systems integration support; technical data; Stockpile Reliability, Quality Assurance and Technical Assistance teams; U.S. Government and contractor technical, engineering, and logistics support services; and other related elements of logistical and program support. The total estimated cost is \$670 million.

This proposed sale will support the foreign policy and national security objectives of the United States by helping to improve the security of a NATO ally that is an important force for political stability and economic progress in Europe.

The proposed sale will improve the Netherlands’ military goals of updating capability while further enhancing interoperability with the United States and other allies. The Netherlands intends to use these defense articles and services to modernize its armed forces and expand its capability to strengthen its homeland defense and deter regional threats. The Netherlands will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Lockheed Martin, Grand Prairie, TX. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require U.S. Government or contractor representatives to travel to the Netherlands for program management reviews to support the program. Travel is expected to occur approximately twice per year as needed to support equipment fielding and training.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 23–08

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(vii) *Sensitivity of Technology*

1. The M142 High Mobility Artillery Rocket System (HIMARS) is a C-130 transportable wheeled launcher mounted on a 5-ton Family of Medium Tactical Vehicles truck chassis. HIMARS is the modern Army-fielded version of the Multiple Launch Rocket System (MLRS) M270 launcher and can fire all of the MLRS Family of Munitions (FOM) including Guided Multiple Launch Rocket System (GMLRS) variants and the Army Tactical Missile System (ATACMS). Utilizing the MLRS FOM, the HIMARS can engage targets between 15 and 300 kilometers with GPS-aided precision accuracy.

2. The Guided Multiple Launch Rocket System (GMLRS) M31A2 Unitary is the Army’s primary munition for units fielding the M142 HIMARS and M270A1 Multiple Launcher Rocket System (MLRS) Launchers. The M31 Unitary is a solid propellant artillery rocket that uses Global Positioning System/Precise Positioning Service (GPS/PPS)-aided inertial guidance to accurately and quickly deliver a single high-explosive blast fragmentation warhead to targets at ranges from 15–70 kilometers. The rockets are fired from a launch pod container that also serves as the storage and transportation container for the rockets. Each rocket pod holds six (6) total rockets.

3. The M30A2 GMLRS Alternative Warhead shares a greater than 90% commonality with the M31A1 Unitary. The primary difference between the GMLRS-U and GMLRS-AW is the replacement of the Unitary’s high explosive warhead with a 200-pound fragmentation warhead of pre-formed tungsten penetrators which is optimized for effectiveness against large area and imprecisely located targets. The munitions otherwise share a common motor, GPS/PPS-aided inertial guidance and control system, fuzing mechanism, multi-option height of burst capability, and effective range of 15–70km.

4. The M57 Army Tactical Missile System (ATACMS)—Unitary is a conventional, semi-ballistic missile that utilizes a 500-pound high explosive warhead. It has an effective range of between 70 and 300 kilometers and has increased lethality and accuracy over previous versions of the ATACMS due to a GPS/Precise Positioning System (PPS) aided navigation system.

5. The highest level of classification of defense articles, components, and

services included in this potential sale is SECRET.

6. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

7. A determination has been made that the Netherlands can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

8. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of the Netherlands.
