

than pursuing a collection after the payment is made.

b. *DNE*: DNEs would strengthen program integrity across programs and agencies as an additional high-quality source of death information. DNEs are assertions by Federal agencies that a beneficiary or other payee has died. Matches to records contained in the DNE database are expected to be higher confidence than larger datasets as each individual death entry has been verified by the initiating agency according to their due diligence procedure(s).

4. *Benefits of streamlining access to the data through the central Do Not Pay Initiative*:

a. *AVS*: It will be beneficial to streamline access to AVS through the Do Not Pay Working System. AVS is provided to Treasury by a financial agent whose services without a central offering would require individual acquisition efforts from non-Treasury agencies. Also, as the operator of the Do Not Pay Working System, Fiscal Service will have the opportunity to offer AVS to FFSA programs. AVS data can be used in coordination with other Do Not Pay and Fiscal Service data products to verify a range of eligibility criteria.

b. *DNE*: It would be beneficial to streamline access to DNE through the Do Not Pay Working System. DNE records are currently owned by Fiscal Service but are not yet being used across agencies and payments. By designating DNE and expanding its use through the Do Not Pay Working System, more agencies will gain access to a high-quality database.

5. *Costs associated with expanding or centralizing access, including modifications needed to system interfaces or other capabilities in order to make data accessible*:

a. *AVS*: Fiscal Service has projected that the cost of AVS would be roughly \$11.8 million over the course of five fiscal years. Any costs associated with modifications to system interfaces can be absorbed into the scope of regular development schedules.

b. *DNE*: Do Not Pay Working System access to DNE data can be expanded at no additional development cost.

6. *Other policy and stakeholder considerations*:

a. *AVS*: AVS has been leveraged by Fiscal Service's Office of Payment Integrity (OPI) for analytics projects related to account verification. OPI estimates a return on investment (ROI) between \$48 and \$431 per dollar spent on AVS searches.

b. *DNE*: There are no other policy and stakeholder considerations for DNE.
