Title of Collection: School Pulse Panel 2024–25 Data Collection Second Quarter Revision.

OMB Control Number: 1850–0969.

Type of Review: A revision of a currently approved ICR.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 53,955.

Total Estimated Number of Annual Burden Hours: 10,175.

Abstract: The School Pulse Panel is conducted by the National Center for Education Statistics (NCES), part of the Institute of Education Sciences (IES), within the United States Department of Education. Initially, the purpose of the study was to collect extensive real-time data on issues brought to light by the COVID–19 pandemic on students and staff, as well as other important education-related issues that could inform data-driven policy decisions, in U.S. public primary, middle, high, and combined-grade schools and districts. Specifically, this was accomplished by collecting data on, among other things, the percentage of the student body starting the school year behind grade level, the types of learning recovery strategies being implemented and the perceived effectiveness of those strategies, classroom behavioral concerns, mental health services provided, and staffing issues. NCES was able to capture each of these pieces in an expedited fashion and report out findings in a matter of weeks, providing rich information to help tell the full story of what students, staff, and administrators were battling on a daily basis. The success of the quick-turnaround nature of the SPP was a clear indication of the immense value of having a real-time data collection vehicle readily available to capture content on prominent events occurring in the school environment. Therefore, stakeholders and ED leadership have asked NCES to continue this type of data collection methodology for the 2023–24 school year and beyond with content extending beyond COVID–19 pandemic impacts on the education environment.

The preliminary activities for the 2024–25 data collection was formally cleared in January 2024 (OMB# 1850–0969 v.12) and the SPP monthly data collection package was formally cleared in June 2024 (OMB# 1850–0969 v.13). A change request (v.14) was cleared in

June 2024 to make changes to the 2024–25 preliminary activities package in order to modify the July 2024 communication materials and screener survey. A change request (v.15) was cleared in August 2024 to make changes to the August 2024, September 2024, and October 2024 instruments, informed by cognitive testing results with school staff. The new revision (v.16) is focused on a 30-day public comment period on new items (within the scope of the research domains previously established) to be collected on the November 2024, December 2024, and January 2025 instruments, as well as planned items for the rest of the study year, through June 2025. These items are considered very close to final and will go through minimal testing with school personnel to examine any comprehension concerns with item wording. This testing will occur simultaneously with when the package is out for the 30-day public comment period. Feedback from this testing, as well as additional input from SPP stakeholders, will result in modifications and additions that will be reflected in future change requests.
