Abstract: The Department of the Interior (DOI) manages an estimated 75 million museum objects and over 92 thousand linear feet of archives in trust for the American public. This diverse collection consists of archaeological artifacts, archives, biological specimens, ethnographic objects, fine arts, geological specimens, historic objects, and paleontological specimens owned and managed by DOI bureaus and offices (bureaus). Although the majority of DOI museum collections are housed in DOI bureau facilities, at least 10 percent are located at more than 1,000 non-Federal repositories, primarily state and tribal institutions, museums, and university departments. Most of DOI museum collections housed in non-Federal repositories resulted from projects on Federal lands, and include objects from the disciplines of archaeology, biology, geology, and paleontology, as well as associated project documentation (archives or associated records). This information collection request is directed to these non-Federal repositories that house DOI museum collections.

DOI museum collections cared for in non-Federal repositories are established as Federal property under Federal law. Permits and other agreements for the collection of artifacts and specimens from public lands managed by DOI further affirm Federal ownership. Federal regulations and DOI policy require that all permittees (authorized individuals) conducting research or performing compliance activities on DOI-managed lands must ensure that any retained museum objects and archives collected or generated during a project are: (1) accessioned and cataloged according to DOI standards in the Interior Collection Management System (ICMS), its successor the Museum Collection Management System (MCMS), or another collection management system from which the

necessary data can be imported into ICMS or MCMS; and (2) housed in an appropriate museum repository that meets professional and DOI museum standards. These requirements help to establish and maintain accountability, as well as ensure the collections' long-term preservation, protection, and availability for access and use.

Upon request by DOI bureaus, voluntary submittal of the information identified below from non-Federal repositories supports DOI's management of its museum collections, as well as compliance with the Native American Graves Protection and Repatriation Act (NAGPRA) where applicable. DOI bureaus may request information within the following categories:

(1) Museum records created to manage DOI museum collections, such as accession, catalog, inventory, loan, and deaccession records, and backups of collection management systems or other software/programs. (REVISED)

(2) Associated records/archives generated by the activity of collecting and analyzing DOI museum collections. (NEW)

(3) Access and use of DOI museum collections, such as use requests, analyses, physical and virtual exhibits, online catalogs and finding aids, presentations, and publications resulting from use. (NEW)

(4) Objects newly identified as under DOI ownership and possible Native American Graves Protection and Repatriation Act (NAGPRA) human remains or cultural items in DOI museum collections. (NEW)

(5) Improved management and care recommendations, including considerations for Duty of Care requirements consistent with NAGPRA. (NEW)

(6) Reports of damaged, deteriorated, missing, or stolen objects. (NEW)

(7) Core management and planning documents, such as scope of collection statement, emergency management, integrated pest management, security, and housekeeping plans. (NEW)

(8) Partnerships, funding, or commercial sponsorships that may involve DOI museum collections. (NEW)

(9) *Facility Checklist for Spaces Housing DOI Museum Property (Checklist)* to capture current environmental, security, and other management controls in place to document and safeguard DOI museum collections and provide recommendations for improvements. (EXISTING)

(10) *Input on Collections from Lands Administered by the U.S. Department of the Interior that are Located at Non-Federal Facilities (Input Form)* to query

a limited range of information about the repository, scope and types of DOI museum collections in the repository, DOI bureaus with which the collections are associated, status of documentation and NAGPRA compliance, and availability of objects and archives for research and other uses. (EXISTING)

The expanded categories of information identified above provide a more accurate representation of the information that DOI bureaus may ask non-Federal repositories to voluntarily provide on DOI museum collections. The proposed changes in this information collection request also include elimination of the three instruction sheets for accession, catalog, and inventory information included in previous iterations, as that information is captured in a revised category identified above.
