As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501-3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Title: Part 25 of the Federal Communications Commission’s Rules Governing the Licensing of, and Spectrum Usage by, Commercial Earth Stations and Space Stations.

FCC Form Number: FCC Form 312 (Main Form and Schedules A, B, and S), FCC Form 312–R.

Type of Review: Revision of a currently approved collection.

Respondents: Businesses or other for-profit entities, not-for-profit institutions.

Number of Respondents and Responses: 3,535 respondents and 3,587 responses.

Estimated Time per Response: 0.5–80 hours.

Frequency of Response: On occasion, one time and annual reporting requirements; third-party disclosure requirement; recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 151, 154(i), 157, 301, 303, 307, 308, 309, and 310.

Total Annual Burden: 27,620 hours.

Total Annual Cost: \$4,154,267.

Needs and Uses: The Commission requests that the Office of Management and Budget (OMB) approve a revision of the information collection titled “Part 25 of the Federal Communications Commission’s Rules Governing the Licensing of, and Spectrum Usage by, Commercial Earth Stations and Space Stations” under OMB Control No. 3060–0678 as a result of a Report and Order (89 FR 34148) adopting a framework to offer supplemental coverage from space (SCS). SCS is a crucial component of the Commission’s vision for a “single network future,” in which satellite and terrestrial networks work seamlessly together to provide coverage that neither network can achieve on its own, and will enable consumers in areas not covered by terrestrial networks to be connected using their existing devices via satellite-based communications. In order to ensure that prospective SCS operators will be able to comply with the applicable rules, that the public interest will be served by granting their applications, and that harmful interference will be avoided to the greatest extent possible thereafter, the Commission seeks approval to collect the following information to confirm

that satellite service operators who seek to enter lease agreements with terrestrial service providers to offer supplemental coverage from space (SCS) do so in compliance with the rules that govern SCS operations.

Specifically, the Commission adopted requirements in its part 25 rules that parties who seek to provide SCS must submit a new or modified FCC Form 312 with the following certifications: that they have submitted a lease notification; that the space station licensee or grantee of market access will provide SCS in the geographic area covered by the licenses held by its terrestrial partner(s); and that SCS earth stations will qualify as licensed by rule stations under the Commission’s part 25 rules. An applicants must also describe its SCS proposal in detail in its FCC Form 312 (Main Form and Schedule S), with a brief description of the coverage areas that will be served, domestically and internationally, and include a list of the file and identification numbers associated with the relevant leasing notification(s) under the Commission’s part 1 rules. This revised information collection is designed to allow Commission staff to carry out its statutory duties to regulate satellite communications in the public interest; namely, to ensure that prospective providers of SCS will operate in compliance with the applicable regulatory framework. The Commission will use this information to assess applicants’ qualifications, and to conclude whether, and under what conditions, grant of an authorization to provide SCS will serve the public interest. This collection will thereby enable the Commission to monitor and enforce the entry criteria that SCS providers must satisfy, and which are designed to minimize the possibility of harmful interference.

Finally, the collection will play a critical role in the Commission’s effort to review and track leasing arrangements that will result in entities providing SCS.
