**Abstract:** The Department of the Interior (DOI) manages an estimated 75 million museum objects and over 92 thousand linear feet of archives in trust for the American public. This diverse collection consists of archaeological artifacts, archives, biological specimens, ethnographic objects, fine arts, geological specimens, historic objects, and paleontological specimens owned and managed by DOI bureaus and offices (bureaus). Although the majority of DOI museum collections are housed in DOI bureau facilities, at least 10 percent are located at more than 1,000 non-Federal repositories, primarily state and tribal institutions, museums, and university departments. Most of DOI museum collections housed in non-Federal repositories resulted from projects on Federal lands, and include objects from the disciplines of archaeology, biology, geology, and paleontology, as well as associated project documentation (archives or associated records). This information collection request is directed to these non-Federal repositories that house DOI museum collections.

DOI museum collections cared for in non-Federal repositories are established as Federal property under Federal law. Permits and other agreements for the collection of artifacts and specimens from public lands managed by DOI further affirm Federal ownership. Federal regulations and DOI policy require that all permittees (authorized individuals) conducting research or performing compliance activities on DOI-managed lands must ensure that any retained museum objects and archives collected or generated during a project are: (1) accessioned and cataloged according to DOI standards in the Interior Collection Management System (ICMS), its successor the Museum Collection Management System (MCMS), or another collection management system from which the
