

Spotted owls are native to western North America. Competition from barred owls (*Strix varia*) has been identified as a primary threat to the northern spotted owl (*Strix occidentalis caurina*), which is listed as threatened under the Endangered Species Act (ESA; 16 U.S.C. 1531 *et seq.*), as well as a threat to the persistence of California spotted owl (*Strix occidentalis occidentalis*), which the Service has proposed for listing (88 FR 11600; February 23, 2023). Barred owls, native to eastern North America, began to expand their range around 1900 as a likely result of European settlement. Barred owls are larger and more aggressive than the northern spotted owl and the California spotted owl. Upon reaching the Pacific Northwest, barred owls displaced spotted owls from their historic territories. Without management of barred owls, extirpation of northern spotted owls from major portions of their historic range is likely in the near future. While barred owls have not substantially impacted California spotted owl populations to date, the establishment of a small barred owl population in the northern Sierra Nevada mountains, and the history of the invasion and impacts on northern spotted owls following such expansion, demonstrates that barred owls are also a significant threat to the persistence of California spotted owls. The purpose of this action is to reduce barred owl populations to improve the survival and recovery of northern spotted owls and to prevent declines in California spotted owls from barred owl competition.

The Service published a notice of intent (NOI) in the **Federal Register** to develop an EIS for this project on July 22, 2022 (87 FR 43886). The Service published a notice of availability (NOA) for the draft EIS on November 17, 2023 (88 FR 80329) and published an NOA for the final EIS on July 5, 2024 (89 FR 55647). The EIS analyzed the environmental consequences of the preferred action (Alternative 2, Management Strategy Implementation), a no action alternative, and four alternatives to the preferred action outlining different management frameworks for entities (Federal, State or Tribal government agencies, or private landowners) to implement barred owl management. All action alternatives included issuance of an MBTA Special Purpose permit for management to reduce barred owl populations in areas within the northern spotted owl's range and to prevent establishment of barred owl populations within the California spotted owl's range.

We are advising the public of the availability of the ROD, documenting the Service's decision to issue a Migratory Bird Special Purpose permit pursuant to the MBTA under EIS, Alternative 2, Management Strategy Implementation (Preferred Alternative). Alternative 2 combines three approaches to barred owl management within the northern spotted owl's range and focuses on early detection and rapid response in the California spotted owl's range. Alternative 2 best accomplishes the purpose and need for action because it will allow for rapid implementation of barred owl management on specific areas across the range of the northern spotted owl in a manner that allows for a swift reduction in barred owl numbers and the impact of barred owls within these targeted management areas. The focus in Alternative 2 on location and removal of all barred owls in the range of the California spotted owl and associated invasion pathways will also limit the invasion of barred owls and allow for removal of those individuals that succeed in establishing territories in the subspecies' range.

The Service has prepared this ROD pursuant to the Council on Environmental Quality's (CEQ's) implementing NEPA regulations at 40 CFR parts 1500–1508, which became effective on May 20, 2022 (87 FR 23453; April 20, 2022). Because the Service published a notice of intent (NOI) to develop an EIS for this project on July 22, 2022, prior to the July 1, 2024, effective date for the Council on Environmental Quality's updated NEPA regulations, the draft EIS, final EIS, and ROD were prepared according to the 2022 regulations.

#### Authority

We provide this notice in accordance with the requirements of NEPA and its implementing regulations (40 CFR 1503.1 and 1506.6).

[Docket No. FWS–R4–ES–2024–0134; FXES11140400000–245–FF04EF4000]

#### Receipt of Incidental Take Permit Application and Proposed Habitat Conservation Plan for the Audubon's Crested Caracara; Hardee County, FL; Categorical Exclusion

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of availability; request for comment.

**SUMMARY:** We, the Fish and Wildlife Service (Service), announce receipt of an application from Mosaic Fertilizer, LLC (applicant) for an incidental take permit (ITP) under the Endangered Species Act. The applicant requests the ITP to take a portion of the breeding territory of the federally listed crested caracara (Audubon's) [FL DPS] (*Caracara plancus audubonii*) incidental to the construction and operation of a phosphate mine in Hardee County, Florida. We request public comment on the application, which includes the applicant's proposed habitat conservation plan (HCP), and on the Service's preliminary determination that the proposed permitting action may be eligible for a categorical exclusion pursuant to the Council on Environmental Quality's National Environmental Policy Act (NEPA) regulations, the Department of the Interior's (DOI) NEPA regulations, and the DOI Departmental Manual. To make this preliminary determination, we prepared a draft environmental action statement and low-effect screening form, both of which are also available for public review. We invite comment from the public and local, State, Tribal, and Federal agencies.

**DATES:** We must receive your written comments on or before October 7, 2024.

#### ADDRESSES:

**Obtaining Documents:** The documents this notice announces, as well as any comments and other materials that we receive, will be available for public inspection online in Docket No. FWS–R4–ES–2024–0134 at <https://www.regulations.gov>.

**Submitting Comments:** If you wish to submit comments on any of the documents, you may do so in writing by one of the following methods:

- **Online:** <https://www.regulations.gov>

Follow the instructions for submitting comments on Docket No. FWS–R4–ES–2024–0134.

- **U.S. mail:** Public Comments

Processing, Attn: Docket No. FWS–R4–

Individuals in the United States who are deaf, deafblind, hard of hearing, or have a speech disability may dial 711 (TTY, TDD, or TeleBraille) to access telecommunications relay services. Individuals outside the United States should use the relay services offered within their country to make international calls to the point-of-contact in the United States.

**SUPPLEMENTARY INFORMATION:** We, the Fish and Wildlife Service (Service), announce receipt of an application from Mosaic Fertilizer, LLC (applicant) for an incidental take permit (ITP) under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The applicant requests the ITP to take the crested caracara (Audubon's) [FL DPS] (*Caracara plancus audubonii*) (caracara), federally listed as threatened under the ESA, incidental to the construction and operation of a phosphate mine in Hardee County, Florida. We request public comments on the application, which includes the applicant's habitat conservation plan (HCP), and on the Service's preliminary determination that this proposed ITP qualifies as low effect, and may qualify for a categorical exclusion pursuant to the Council on Environmental Quality's National Environmental Policy Act (NEPA) regulations (40 CFR 1501.4), the Department of the Interior's (DOI) NEPA regulations (43 CFR part 46), and the DOI's Departmental Manual (516 DM 8.5(C)(2)). To make this preliminary determination, we prepared a draft environmental action statement and low-effect screening form, both of which are also available for public review.

### Proposed Project

The applicant requests a 10-year ITP to take approximately 42.7 acres (ac) of the 70-ac primary zone of a caracara breeding territory incidental to the construction and operation of a phosphate mine on a 4,386.1-ac parcel in Hardee County. The primary zone of a caracara breeding pair is considered of vital importance for breeding success. The project site is located east of the South Fort Meade Mine and north of State Road 64, in sections 1-4 and 12-14, Township 33 South, Range 26 East, sections 5, 6, 8, 9, 14-16, 21-23, and 26-28, Township 33 South, and Range 27 East, at Latitude 27°36'10.1" longitude 81°36'1.4", Hardee County,

Florida. The applicant proposes to minimize disturbance on nesting caracaras by conducting all mining activities within the 70-ac primary zone during the non-breeding season. To mitigate for the 47-ac portion of unavoidable impacts on the caracara's primary zone, the applicant proposes to donate \$38,000 to restore 70 ac of caracara habitat per the Service's Audubon's crested caracara conservation guidelines.

### Our Preliminary Determination

The Service has made a preliminary determination that the applicant's proposed project, including the construction and operation of a phosphate mine and associated infrastructure, would individually and cumulatively have a minor effect on the caracara and the human environment. Therefore, we have preliminarily determined that the proposed ESA section 10(a)(1)(B) permit would be a low-effect ITP that individually or cumulatively would have a minor effect on the caracara and may qualify for application of a categorical exclusion pursuant to the Council on Environmental Quality's NEPA regulations, DOI's NEPA regulations, and the DOI Departmental Manual. A low-effect ITP is one that would result in (1) minor or nonsignificant effects on species covered in the HCP; (2) nonsignificant effects on the human environment; and (3) impacts that, when added together with the impacts of other past, present, and reasonably foreseeable actions, would not result in significant cumulative effects to the human environment.

### Next Steps

The Service will evaluate the application and the comments to determine whether to issue the requested ITP. We will also conduct an intra-Service consultation pursuant to section 7 of the ESA to evaluate the effects of the proposed take. After considering the preceding and other matters, we will determine whether the permit issuance criteria of section 10(a)(1)(B) of the ESA have been met. If met, the Service will issue ITP number PER11778402 to Mosaic Fertilizer, LLC.

### Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, be aware that your entire comment, including your personal identifying information, may be made available to the public. If you submit a comment at <https://www.regulations.gov>, your entire

comment, including any personal identifying information, will be posted on the website. If you submit a hardcopy comment that includes personal identifying information, such as your address, phone number, or email address, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. Moreover, all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

### Authority

The Service provides this notice under section 10(c) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and its implementing regulations (50 CFR 17.32) and the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*) and its implementing regulations (40 CFR 1500-1508 and 43 CFR 46).

### Endangered and Threatened Species; Receipt of Recovery Permit Applications

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of receipt of permit applications; request for comments.

**SUMMARY:** We, the U.S. Fish and Wildlife Service, have received applications for permits to conduct activities intended to enhance the propagation or survival of endangered or threatened species under the Endangered Species Act. We invite the public and local, State, Tribal, and Federal agencies to comment on these applications. Before issuing any of the requested permits, we will take into consideration any information that we receive during the public comment period.

**DATES:** We must receive your written comments on or before October 7, 2024.

**ADDRESSES:** Document availability and comment submission: Submit requests
