[Docket No. ID-10152-000]

Myers, Franklin B.; Notice of Filing

Take notice that on August 28, 2024, Franklin B. Myers submitted for filing, application for authority to hold interlocking positions, pursuant to section 305(b) of the Federal Power Act, 16 U.S.C. 825d(b) and Part 45.8 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR part 45.8.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://www.ferc.gov>). [Docket No. CP14-517-002]

Golden Pass LNG Terminal, LLC; Notice of Request for Extension of Time

Take notice that on August 28, 2024, Golden Pass LNG Terminal, LLC (GPLNG) requested that the Commission grant an extension of time, until November 30, 2029, to construct and place into service its Golden Pass Export Terminal Project (Project), located in the vicinity of Sabine Pass, Texas, as authorized in the December 21, 2016 Order Granting Authorizations under Sections 3 and 7 of the Natural Gas Act (Order).¹ The Order required GPLNG to complete construction of the Project and make it available for service within five years of the date of the Order, or by December 21, 2021.

On December 11, 2019, the Commission granted GPLNG an extension of time, until November 30, 2026, to complete construction of the

Project and make it available for service.²

GPLNG states that, due to delays caused by the bankruptcy filing of the lead construction contractor, remaining schedule uncertainties related to the transition to a new lead contractor, and other possible delays outside of GPLNG's control that may occur, such as potential hurricane impacts, and for commissioning and start-up activities, that additional time is required for completing construction of the project and placing it into service.

This notice establishes a 15-calendar day intervention and comment period deadline. Any person wishing to comment on GPLNG's request for an extension of time may do so. No reply comments or answers will be considered. If you wish to obtain legal status by becoming a party to the proceedings for this request, you should, on or before the comment date stated below, file a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (NGA) (18 CFR 157.10).

As a matter of practice, the Commission itself generally acts on requests for extensions of time to complete construction for NGA facilities when such requests are contested before order issuance. For those extension requests that are contested,³ the Commission will aim to issue an order acting on the request within 45 days.⁴ The Commission will address all arguments relating to whether the applicant has demonstrated there is good cause to grant the extension.⁵ The Commission will not consider arguments that re-litigate the issuance of the certificate order, including whether the Commission properly found the project to be in the public convenience and necessity and whether the Commission's environmental analysis for the certificate complied with the National Environmental Policy Act (NEPA).⁶ At the time a pipeline requests an extension of time, orders on certificates of public convenience and necessity are final and the Commission

will not re-litigate their issuance.⁷ The Director of the Office of Energy Projects, or his or her designee, will act on all of those extension requests that are uncontested.

Montana Department of Natural Resources and Conservation; Notice of Availability of Final Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for a new license to continue to operate and maintain the Broadwater Hydroelectric Project, located on the Missouri River in Broadwater County, Montana and has prepared a Final Environmental Assessment (FEA) for the project. The project is adjacent to and includes federal lands administered by the Bureau of Land Management.

The FEA contains staff's analysis of the potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The Commission provides all interested persons with an opportunity to view and/or print the FEA via the internet through the Commission's Home Page (<http://www.ferc.gov>), using the "eLibrary" link.
