DEPARTMENT OF STATE

[Public Notice: 12537]

Proposed Establishment of Federally Funded Research and Development Centers—Supplemental Notice

ACTION: Notice.

SUMMARY: The United States Department of State (DoS), Bureau of Administration, intends to sponsor Federally Funded Research and Development Centers (FFRDC) to facilitate public-private collaboration for numerous activities related to diplomacy and modernization. This is a supplemental notice to address outstanding public comments received through August 15, 2024.

DATES: Written comments are now closed. This will be the fourth (4th) and final notice in this series.

SUPPLEMENTARY INFORMATION: The Department of State leads US engagement around the world building alliances and partnerships; facing up to aggression; aiding and supporting emerging democracies; and preserving US interests abroad. In a rapidly changing world with shifting politics, accelerated economic developments, global challenges such as climate change, and the increasing role digitization plays for both opportunity and threats, the Department is committed to leading through both policy and operational engagement on behalf of the nation and our government.

In a letter introducing the Department of State and U.S. Agency for International Development Joint Strategic Plan for 2022–2026, Secretary Blinken stated, “we are working to modernize and equip the Department and USAID to lead on 21st-Century challenges and deliver for the American people.”

Achieving U.S. goals for global leadership over the next decade will require the following:

- A diplomatic corps to use data in new ways to develop more foresight and insight, to inform policy options, to take actions and measure their effectiveness;
 - New cross-sector partnerships and coalitions;
 - Intergovernmental partnerships with the Department of Defense, the intelligence agencies, the Departments of Commerce, Treasury, Homeland Security, and Health and Human Services, and cross-government Councils (e.g., National Economic Council, National Security Council);
 - New capabilities to plan, manage and execute initiatives and programs;
 - A workforce that uses digital technology as tools to advance democracy and protect our interests and counter the use of these same technologies as a threat; and
 - An organization and operation that is agile and adaptive to a changing environment; attractive to new talent; and fosters long-term commitment between the organization and its people.
- The Department requires long-term partnerships with organizations that can bring research, development, innovation, and support needed to guide the leadership and employees through this transformative period in our history. This will allow the Department to focus on the mission at hand, while adopting and integrating changes necessary to make consistent progress on these goals and surge, when needed, to address urgent issues that require data, partnerships, technology
