

cluster munitions statute and policy. The AW carries a 200-pound fragmentation assembly filled with high explosives which, upon detonation, accelerates two layers of preformed tungsten penetrators toward a target location. This provides an effective capability against imprecisely located targets over a wide area without the risk of leaving behind the unexploded ordinance associated with legacy cluster munitions. The GMLRS-AW is a material change to the GMLRS-U, but the two systems share a greater than 90% commonality.

4. The M57 Army Tactical Missile Systems (ATACMS)—Unitary is a conventional, semi-ballistic missile which utilizes a 500-pound high explosive warhead which can be fired from the HIMARS. ATACMS is a guided by GPS-aided inertial navigation systems to provide precise targeting over ranges of up to 270km.

5. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

6. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software

elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

7. A determination has been made that Morocco can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

8. All defense articles and services listed in this transmittal are authorized for release and export to the Government of Morocco.

\* As defined in Section 47(6) of the Arms Export Control Act.

#### **POLICY JUSTIFICATION**

##### *Kuwait—Cartridge Actuated Device/Propellant Actuated Devices (CAD/PAD) and Support*

The Government of Kuwait has requested to buy additional Cartridge Actuated Device/Propellant Actuated Devices (CAD/PAD) and support that will be added to a previously implemented case that was under Congressional notification threshold. The original FMS case, valued at \$48.2 million, included CAD/PAD items and support for Calendar Years 2025–2026 (CY25–CY26). This notification is for CAD/PAD items and support of Kuwait's F/A–18 and KC–130/J aircraft fleet. Also included is engineering, technical, and program support and other related elements of logistics and program support. The total estimated cost is \$59.1 million.

This proposed sale will support the foreign policy and national security objectives of the United States by helping to improve the security of a Major Non-NATO ally that has been an important force for political stability and economic progress in the Middle East.

The proposed sale will provide Kuwait with the equipment and sustainment support necessary to maintain its air defense capacity to defend its territorial integrity and to meet its national defense requirements. Kuwait will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors are currently unknown, as there will be competitive contract solicitations after FMS case implementation. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this sale will not require the assignment of any U.S. Government or contractor representatives to Kuwait.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. Cartridge Actuated Device/Propellant Actuated Device (CAD/PADs) are the explosive devices installed within the aircraft escape and safety systems to save lives during emergencies. CAD/PAD are also used to power the aircraft systems that deploy weapons and jettison equipment.

2. The highest level of classification of defense articles, components, and services included in this potential sale is UNCLASSIFIED.

3. If a technologically advanced adversary were to obtain knowledge of the hardware and software elements, the information could be used to develop countermeasures or equivalent systems which might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the Government of Kuwait can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal are authorized for release and export to the Government of Kuwait.
