SUPPLEMENTARY INFORMATION:

I. Introduction

On August 6, 2024, the NRC granted an exemption in response to a request submitted by Pacific Gas and Electric Company.

This exemption temporarily allows the licensee to deviate from certain requirements of part 73 of title 10 of the *Code of Federal Regulations* (10 CFR), “Physical Protection of Plants and Materials,” subpart T, “Security Notifications, Reports, and Recordkeeping.” In support of its exemption request, the licensee agreed to effect site-specific administrative controls that maintain the approach to complying with 10 CFR part 73 in effect prior to the NRC’s issuance of a final rule, “Enhanced Weapons, Firearms Background Checks, and Security Event Notifications,” which was published in the **Federal Register** on March 14, 2023, and became effective on April 13, 2023 (88 FR 15864).

II. Availability of Documents

The table in this notice provides transparency regarding the number and type of exemptions the NRC has issued and provides the facility name, docket number, document description, document date, and ADAMS accession number for each exemption issued. Additional details on the exemption issued, including the exemption request submitted by the licensee and the NRC’s decision, are provided in the exemption approval listed in the following table. For additional directions on accessing information in ADAMS, see the **ADDRESSES** section of this document.

Attachment—Exemption

NUCLEAR REGULATORY COMMISSION

Docket Nos. 50-445 and 50-446

Vistra Operations Company LLC Comanche Peak Nuclear Power Plant, Unit Nos. 1 and 2 Exemption

I. Background

Vistra Operations Company LLC (Vistra OpCo, the licensee) is the holder of Renewed Facility Operating License Nos. NPF-87 and NPF-89, for the Comanche Peak Nuclear Power Plant, Unit Nos. 1 and 2 (Comanche Peak), respectively. The licenses provide, among other things, that the licensee is subject to all rules, regulations, and orders of the U.S. Nuclear Regulatory Commission (NRC, the Commission) now or hereafter in effect. These facilities consist of two pressurized water reactors located in Somervell County, Texas.

II. Request/Action

In accordance with Section 50.71 of Title 10 of the *Code of Federal Regulations* (10 CFR), "Maintenance of records, making of reports," paragraph (e)(4) states, in part, that "Subsequent revisions [to the Updated Final Safety Analysis Report (UFSAR) submitted as part of the original license application] must be filed annually or 6 months after each refueling outage provided the interval between successive updates [to the UFSAR] does not exceed 24

months." By letter dated August 24, 2023 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML23236A605), as supplemented by letter dated August 15, 2024 (ML24228A186), Vistra OpCo requested that the due date for submittal of the Comanche Peak UFSAR be by July 31 of every odd-numbered year, provided the interval between successive updates does not exceed 24 months.

III. Discussion

Pursuant to 10 CFR 50.12, "Specific exemptions," the NRC may, upon application by any interested person or upon its own initiative, grant exemptions from the requirements of 10 CFR part 50, "Domestic Licensing of Production and Utilization Facilities," including 10 CFR 50.71(e)(4) when: (1) the exemptions are authorized by law, will not present an undue risk to the public health and safety, and are consistent with the common defense and security; and (2) special circumstances are present. Under 10 CFR 50.12(a)(2), special circumstances include, among other things, whenever application of the regulation in the particular circumstances would not serve, or is not necessary to achieve, the underlying purpose of the rule.

A. The Exemption Is Authorized by Law

The regulation at 10 CFR 50.71(e)(4) requires revisions to UFSARs to be filed annually or 6 months after each refueling outage, provided the interval between successive updates does not exceed 24 months. The underlying purpose of the regulation is to ensure that the licensee periodically updates its UFSAR so that the UFSAR remains up-to-date and accurately reflects the plant design and operation for use in subsequent reviews or activities concerning that facility performed by the licensee, the Commission, and other interested parties. The proposed exemption would change the current UFSAR submittal schedule for Comanche Peak to a calendar-based schedule that would not exceed the maximum 24 months between successive updates as required by 10 CFR 50.71(e)(4). Submitting the UFSAR updates for Comanche Peak as proposed by July 31 of the odd year continues to maintain the UFSAR information up-to-date. The NRC staff has determined that granting the licensee's proposed exemption will not result in a violation of the Atomic Energy Act of 1954, as amended, or the Commission's regulations. Therefore, the exemption is authorized by law.
