

systems to recover and adapt while ability to withstand may be already covered in the current risk assessment and management efforts. We are particularly interested in how resilience by design or resilience by intervention can prepare for recovery and adaptation in different threat scenarios as well as in threat-agnostic situations.

Examples of domains and application of interest include but are not limited to critical infrastructure and systems for energy, transportation, medical, agriculture, water, space, manufacturing, and other R&D topic areas in which the strategic plan should focus, as well as details that should be considered when/if the topic area is elaborated in the strategic plan.

This RFI is NOT soliciting approaches solely focused on risk assessment and management through shielding cyber-physical systems from specific threats including threat identification and sensing, or through hardening the system to make it less vulnerable to specific threat or disruptions. Submitters are encouraged to address the topics of this RFI clearly and concisely.

## NUCLEAR REGULATORY COMMISSION

[NRC–2024–0166]

### NRC Implementation of the Accelerating Deployment of Versatile, Advanced Nuclear for Clean Energy Act of 2024

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Notice of public meetings.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) is implementing the requirements in the Accelerating Deployment of Versatile, Advanced Nuclear for Clean Energy Act of 2024 (the ADVANCE Act, or the Act). The NRC plans to hold public meetings periodically to support the NRC's implementation of the ADVANCE Act.

**DATES:** This document was published in the **Federal Register** on September 26, 2024. Public meetings will be noticed in the NRC's Public Meeting Notice System at least 10 days in advance of the scheduled meeting. The NRC will not issue a separate **Federal Register** notice each time a public meeting is scheduled.
