

The agenda for the meeting includes the following topics:

- Heliophysics Program Annual Performance Review According to the Government Performance and Results Act Modernization Act
- Heliophysics Division Update

It is imperative that these meeting be held on these days to accommodate the scheduling priorities of the key participants.

For more information, please visit the committee website link at <https://science.nasa.gov/researchers/nac/science-advisory-committees/hpac#meetingdocs>.

Jamie M. Krauk,

*Advisory Committee Management Officer,
National Aeronautics and Space
Administration.*

BILLING CODE 7510–13–P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice: 24–066]

Name of Information Collection: NASA Special Events

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Notice of information collection.

SUMMARY: The National Aeronautics and Space Administration, as part of its continuing effort to reduce paperwork and respondent burden, under the Paperwork Reduction Act, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections.

DATES: Comments are due by October 28, 2024.

ADDRESSES: Written comments and recommendations for this information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain.

Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to NASA PRA Clearance Officer, Stayce Hoult, NASA Headquarters, 300 E Street SW, JC0000, Washington, DC 20546, phone 256–714–8575, or email hq-ocio-pra-program@mail.nasa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

The National Aeronautics and Space Administration (NASA) is committed to effectively performing the Agency’s communication function in accordance with the Space Act Section 203(a)(3) to “provide for the widest practicable and appropriate dissemination of information concerning its activities and the results thereof,” and to enhance public understanding of, and participation in, the nation’s space program in accordance with the NASA Strategic Plan. The Space Act of 1958, directs the Agency to expand human knowledge of Earth and space phenomena. Organizing outreach events is one way NASA intends to leverage excitement about the nation’s space program and expand human knowledge of Earth and space phenomena. In order to organize effective outreach events and registration opportunities for members of the public, it is necessary to collect information from perspective guests and those that will check-in the guests at events. The NASA Special Events System is a tool to allow invitees to register for and check-in to NASA event opportunities (launch viewing, agency engagements, etc.) in a single location.

II. Methods of Collection

The NASA Special Events tool is a web-based application on a Salesforce platform that enables the NASA OCOMM team to manage guest information, communication, and reporting agency-wide. The intent of using electronic collection techniques is to increase the accuracy of information gathered and to streamline the process for guests and workforce alike.

III. Data

Title: NASA Special Events.
OMB Number: 2700–new.
Type of review: New Information Collection.
Affected Public: 35,300.
Estimated Annual Number of Activities: 15.
Estimated Number of Respondents per Activity: 650.
Annual Responses: 10,000.
Estimated Time per Response: 11 minutes.
Estimated Total Annual Burden Hours: 4,046 hours.

IV. Request for Comments

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of NASA, including whether the information collected has practical utility; (2) the accuracy of NASA’s estimate of the burden

(including hours and cost) of the proposed collection of information; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including automated collection techniques or the use of other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the request for OMB approval of this information collection. They will also become a matter of public record.

Stayce Hoult,

PRA Clearance Officer, National Aeronautics and Space Administration.

BILLING CODE 7510–13–P

NUCLEAR REGULATORY COMMISSION

[NRC–2023–0145]

Interim Staff Guidance: Radiological Survey and Dose Modeling of the Subsurface To Support License Termination

AGENCY: Nuclear Regulatory Commission.

ACTION: Final guidance; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing the Division of Decommissioning, Uranium Recovery, and Waste Programs (DUWP), Interim Staff Guidance (ISG), DUWP–ISG–02, “Radiological Survey and Dose Modeling of the Subsurface to Support License Termination.” The purpose of this ISG is to provide guidance on surveys of open surfaces in the subsurface, including open excavations, materials planned for reuse, and substructures. This ISG also provides guidance on the use of commonly used decommissioning dose modeling codes for submerged and partially submerged substructures to develop clean-up levels, and on methods to evaluate risk from existing groundwater contamination. This ISG supplements guidance found in NUREG–1757, Volume 2, Revision 2, which pertains to licensees subject to the license termination rule found in NRC regulations. This ISG is intended for use by applicants, licensees, and NRC staff. The guidance is also available to Agreement States and the public.

DATES: This guidance is effective on October 28, 2024.

ADDRESSES: Please refer to Docket ID NRC–2023–0145 when contacting the

NRC about the availability of information regarding this document. You may obtain publicly available information related to this document using any of the following methods:

- *Federal Rulemaking Website*: Go to <https://www.regulations.gov> and search for Docket ID NRC-2023-0145. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301-415-0624; email: Stacy.Schumann@nrc.gov. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *NRC's Agencywide Documents Access and Management System (ADAMS)*: You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, at 301-415-4737, or by email to PDR.Resource@nrc.gov. The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document. The ISG "Radiological Survey and Dose Modeling of the Subsurface to Support License Termination," is available in ADAMS under Accession No. ML24197A219.

- *NRC's PDR*: The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1-800-397-4209 or 301-415-4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Cynthia Barr, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-4015; email: Cynthia.Barr@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Background

The NRC is issuing this ISG to supplement guidance provided in NUREG-1757, Volume 2, Revision 2, "Consolidated Decommissioning Guidance, Characterization, Survey, and Determination of Radiological Criteria," which was issued in July 2022 (ADAMS Accession No. ML22194A859). The ISG provides additional guidance developed after Revision 2 to NUREG-1757, Volume 2, was published related to surveys of open surfaces in the

subsurface, including open excavations, materials planned for reuse, and substructures. The ISG also provides guidance on the use of commonly used decommissioning dose modeling codes to develop clean-up levels for submerged and partially submerged substructures, and on methods to evaluate risk from existing groundwater contamination. NRC staff held two subsurface investigations workshops on July 14-15, 2021, and May 11, 2022, to help support the development of this ISG, and contracted with Oak Ridge Associated Universities to develop guidance on acceptable survey methods.

On October 19, 2023, the NRC issued a **Federal Register** notice (88 FR 72112) soliciting public comment on its draft ISG, "Radiological Survey and Dose Modeling of the Subsurface to Support License Termination." The NRC received comments from the Nuclear Energy Institute, by letter dated December 13, 2023 (ADAMS Accession No. ML24009A037); EnergySolutions, by letter dated December 18, 2023 (ADAMS Accession No. ML23353A243); and the State of New Jersey Department of Environmental Protection, by email dated December 21, 2023 (ADAMS Accession No. ML24009A080). No other comments were submitted. The NRC staff considered those comments in developing the final version of the ISG. The staff's responses to the comments are provided in Appendix D, "Comment Responses," of the final ISG. The NRC also issued a draft Regulatory Analysis for the draft ISG for public comment (ADAMS Accession No. ML23177A009). No comments were received on the draft Regulatory Analysis. The final Regulatory Analysis is available in ADAMS under ML24200A233.

II. Backfitting, Forward Fitting, and Issue Finality

Issuance of this ISG will not (i) constitute backfitting as defined in sections 50.109, 70.76, or 72.62 of title 10 of the *Code of Federal Regulations* (10 CFR), "Backfitting," and as described in Management Directive (MD) 8.4, "Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests"; (ii) affect issue finality of any approval issued under 10 CFR part 52, "Licenses, Certifications, and Approvals for Nuclear Power Plants"; or (iii) constitute forward fitting as that term is defined and described in MD 8.4. This ISG states the NRC staff's position on acceptable methods for surveys of open surfaces in the subsurface, including open excavations, materials planned for reuse, and substructures, as well as guidance on the use of commonly used

decommissioning dose modeling codes for submerged and partially submerged substructures to develop clean-up levels, and on methods to evaluate risk from existing groundwater contamination. Applicants and licensees will not be required to comply with the positions set forth in this ISG.

III. Congressional Review Act

This ISG is a rule as defined in the Congressional Review Act (5 U.S.C. 801-808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

Dated: September 23, 2024.

For the Nuclear Regulatory Commission.

Jennifer Whitman,

Acting Director, Division of Decommissioning, Uranium Recovery, and Waste Programs, Office of Nuclear Material Safety and Safeguards.

BILLING CODE 7590-01-P

NUCLEAR REGULATORY COMMISSION

[NRC-2024-0001]

Sunshine Act Meetings

TIME AND DATE: Weeks of September 30, October 7, 14, 21, 28, and November 4, 2024. The schedule for Commission meetings is subject to change on short notice. The NRC Commission Meeting Schedule can be found on the internet at: <https://www.nrc.gov/public-involve/public-meetings/schedule.html>.

PLACE: The NRC provides reasonable accommodation to individuals with disabilities where appropriate. If you need a reasonable accommodation to participate in these public meetings or need this meeting notice or the transcript or other information from the public meetings in another format (e.g., braille, large print), please notify Anne Silk, NRC Disability Program Specialist, at 301-287-0745, by videophone at 240-428-3217, or by email at Anne.Silk@nrc.gov. Determinations on requests for reasonable accommodation will be made on a case-by-case basis.

STATUS: Public.

Members of the public may request to receive the information in these notices electronically. If you would like to be added to the distribution, please contact the Nuclear Regulatory Commission, Office of the Secretary, Washington, DC 20555, at 301-415-1969, or by email at Betty.Thweatt@nrc.gov or Samantha.Miklaszewski@nrc.gov.

MATTERS TO BE CONSIDERED:
