

individuals and families who are receiving services under such programs or initiatives, the gaps in early childhood home visitation in the state, and the extent to which such programs or initiatives are meeting the needs of eligible families.

(3) The state’s capacity for providing substance abuse treatment and counseling services to individuals and families in need of such treatment or services.

The SIR provided guidance to states in updating their statewide needs assessments and submitting the required information to HRSA. States that elected not to apply or be awarded MIECHV funds were encouraged to work with nonprofit organizations that received awards to provide MIECHV-supported services within the state and determine whether they will submit their needs assessments directly or through the nonprofit organization awardee. HRSA and recipients providing MIECHV

services within states used the information collected through the needs assessment update to ensure the continued provision of MIECHV home visiting services in at-risk communities. The information is also used to support program planning, improvement, and decision-making. States wishing to amend their needs assessment will be asked to provide new information and supporting data. HRSA will provide specific instructions on timeline and the amendment process to awardees who request to amend their needs assessment update in advance of their fiscal year 2025 funding application. HRSA is not proposing any changes to the previously approved Needs Assessment SIR.

Likely Respondents: MIECHV Program Awardees that are states, jurisdictions, and where applicable, nonprofit organizations providing services within states. Based on preliminary interest expressed by MIECHV awardees to date, HRSA anticipates that approximately 35

of the 56 awardees may respond to this opportunity.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below. Burden hours reflect that existing needs assessments will be amended rather than fully developed.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Maternal, Infant, and Early Childhood Home Visiting Program Statewide Needs Assessment Update—Amended	35	1	35	30	1,050
Total	35	35	1,050

Maria G. Button,

Director, Executive Secretariat.
