SUPPLEMENTARY INFORMATION: This is a proposed extension of the ICR, which is currently approved through September 30, 2024. An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

Public comments were previously requested via the **Federal Register** on January 17, 2024, during a 60-day comment period (89 FR 2946). This notice allows for an additional 30 days for public comments. Supporting documents, which explain in detail the

information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. Abstract: This ICR covers the recordkeeping and reporting requirements for all aspects of the mandates in Title VI of the Toxic Substances Control Act (TSCA) and implementing regulations in 40 CFR part 770 for Formaldehyde Emission Standards for Composite Wood Products, including actions relating to accreditation bodies (ABs) and third-party certifiers (TPCs) that participate in the third-party certification program.

Form Number: 9600-049.

Respondents/affected entities: Entities potentially affected by this ICR include regulated entities (e.g., manufacturers (defined by statute to include importers) and processors of composite wood products) and participants in the third-party certification program.

Respondent's obligation to respond: Mandatory, per TSCA Title VI and 40 CFR part 770.

Estimated number of respondents: 992,758 (total).

Frequency of response: On occasion.

Total estimated burden: 456,295 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated costs: \$121,806,311 (per year), which includes \$112,389,751 in annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an overall increase of 345,066 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This change, which is discussed in more detail in the ICR, reflects revisions to the estimates for producers, TPCs and ABs; inclusion of 2,241 laminators still using resins that will be defined as hardwood plywood producers and will incur costs and burden starting in 2024; and revisions to labor and cost estimates to reflect 2022 and 2023 prices. These changes are considered to be adjustments.

Director, Information Engagement Division.
