

824a(e)) and regulations thereunder (10 CFR 205.300 *et seq.*). Sections 301(b) and 402(f) of the DOE Organization Act (42 U.S.C. 7151(b) and 7172(f)) transferred this regulatory authority, previously exercised by the now-defunct Federal Power Commission, to DOE.

Section 202(e) of the FPA provides that an entity which seeks to export electricity must obtain an order from DOE authorizing that export. (16 U.S.C. 824a(e)). On April 10, 2023, the authority to issue such orders was delegated to the DOE's Grid Deployment Office (GDO) by Delegation Order No. S1-DEL-S3-2023 and Redlegation Order No. S3-DEL-GD1-2023.

On August 16, 2024, ESJ US filed an application (Application or App.) with DOE for authorization to transmit electric energy from the United States to Mexico. App. at 1. According to the Application, ESJ US is a power marketer and a Delaware limited liability company authorized to operate in California. *Id.* at 1, 6. Further, the Applicant states its corporate parent, Energia Sierra, S. de R.L. de C.V., is a "wholly-owned subsidiar[y] of Sempra Infrastructure Partners, LP, which in turn is indirectly majority owned and controlled by Sempra, a publicly traded utility holding company based in San Diego, California." *Id.* at 1-2. ESJ US states it "will sell energy, capacity and/or ancillary services into the [California Independent Service Operator (CAISO)] balancing authority area [.]" *Id.*

The Applicant represents that their exports would "not impair the sufficiency of electric supply, nor would it impede or tend to impede regional coordination of electric utility planning or operation." *Id.* at 7. ESJ US further states that the electric power it "plans to export will be surplus energy obtained in wholesale markets, and any such export transactions will be completed using CAISO's procedures and/or market structures, . . . applicable market rules implemented by the CAISO, and reliability standards implemented by the [North American Electric Reliability Corporation] and the [Western Electric Reliability Council]." *Id.* 8-9. The Applicant asserts that its export transactions therefore "will not adversely impact native load customers or other market participants, and will not compromise transmission security or reliability." *Id.* at 9.

The existing international transmission facility to be utilized by the Applicant has been previously authorized by a Presidential permit issued pursuant to Executive Order 10485, as amended, and is appropriate

for open access transmission by third parties. *See App.* at 10.

Procedural Matters: Any person desiring to be heard in this proceeding should file a comment or protest to the Application at Electricity.Exports@hq.doe.gov. Protests should be filed in accordance with Rule 211 of FERC's Rules of Practice and Procedure (18 CFR 385.211). Any person desiring to become a party to this proceeding should file a motion to intervene at Electricity.Exports@hq.doe.gov in accordance with FERC Rule 214 (18 CFR 385.214).

Comments and other filings concerning ESJ US's Application should be clearly marked with GDO Docket No. EA-516. Additional copies are to be provided directly to Jerrod L. Harrison, Sempra Infrastructure, 488 8th Avenue, HQ12, San Diego, CA 92101, jharrison@sempraglobal.com, and Katy Wilson, Sempra Infrastructure, 488 8th Avenue, San Diego, CA 92101, kwilson@sempraglobal.com.

A final decision will be made on the requested authorization after the environmental impacts have been evaluated pursuant to DOE's National Environmental Policy Act Implementing Procedures (10 CFR part 1021) and after DOE evaluates whether the proposed action will have an adverse impact on the sufficiency of supply or reliability of the United States electric power supply system.

Copies of this Application will be made available, upon request, by accessing the program website at <https://www.energy.gov/gdo/pending-applications-0> or by emailing Electricity.Exports@hq.doe.gov.

[Project No. 2444–042]

Northern States Power Company; Notice of Intent To Prepare an Environmental Assessment

On July 21, 2023, Northern States Power Company filed a relicense application for the 1.2-megawatt White River Hydroelectric Project No. 2444 (project). The project is located on the White River in Ashland and Bayfield Counties, New York.

In accordance with the Commission's regulations, on June 14, 2024, Commission staff issued a notice that the project was ready for environmental analysis (REA Notice). Based on the information in the record, including comments filed on the REA Notice, staff does not anticipate that licensing the project would constitute a major Federal action significantly affecting the quality of the human environment. Therefore, staff intends to prepare an

Environmental Assessment (EA) on the application to relicense the project.¹

The EA will be issued and circulated for review by all interested parties. All comments filed on the EA will be analyzed by staff and considered in the Commission's final licensing decision.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or OPP@ferc.gov.

The application will be processed according to the following schedule. The EA will be issued for a 30-day comment period. Revisions to the schedule may be made as appropriate.

Milestone	Target date
Commission issues EA.	May 30, 2025.
