*Description of Proposed Mitigation, Monitoring and Reporting Measures*

The proposed mitigation, monitoring, and reporting measures included as requirements in this authorization are identical to those included in the **Federal Register** notice announcing the issuance of the initial IHA, and the discussion of the least practicable adverse impact included in that document and the notice of the proposed IHA remains accurate.

**Comments and Responses**

As noted previously, NMFS published a notice of a proposed IHA (87 FR 68442, November 15, 2022) and solicited public comments on both our proposal to issue the initial IHA for Replacement of Pier 302 at Naval Base Point Loma and on the potential for a renewal IHA, should certain requirements be met.

All public comments were addressed in the notice announcing the issuance of the initial IHA (88 FR 6703, February 1, 2023) and none of the comments specifically pertained to the renewal of the IHA.

**Preliminary Determinations**

The U.S. Navy’s action will require completing a subset of pile driving activities that were not able to be finished under the initial IHA. They need to install 17, 6-inch round steel piles using a vibratory hammer, but all other project aspects and anticipated impacts remain the same. Marine mammal abundance, potential effects, mitigation, and monitoring all remain the same. Only estimated take numbers are changing to reflect 2 days of pile driving compared to 32 in the initial IHA.

NMFS has preliminarily concluded that there is no new information suggesting that our analysis or findings should change from those reached for the initial IHA. Based on the information and analysis contained here and in the referenced documents, NMFS has determined the following: (1) the required mitigation measures will affect the least practicable impact on marine mammal species or stocks and their

habitat; (2) the authorized takes will have a negligible impact on the affected marine mammal species or stocks; (3) the authorized takes represent small numbers of marine mammals relative to the affected stock abundances; (4) the U.S. Navy’s activities will not have an unmitigable adverse impact on taking for subsistence purposes as no relevant subsistence uses of marine mammals are implicated by this action, and; (5) appropriate monitoring and reporting requirements are included.

**Endangered Species Act**

Section 7(a)(2) of the Endangered Species Act (ESA; 16 U.S.C. 1531 *et seq.*) requires that each Federal agency ensure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS consults internally whenever we propose to authorize take for endangered or threatened species.

No incidental take of ESA-listed species is proposed for authorization or expected to result from this activity. Therefore, NMFS has determined that formal consultation under section 7 of the ESA is not required for this action.

**Proposed Renewal IHA and Request for Public Comment**

As a result of these preliminary determinations, NMFS proposes to issue a renewal IHA to the U.S. Navy for conducting Replacement of Pier 302 at Naval Base Point Loma in San Diego, California through September 30, 2025, provided the previously described mitigation, monitoring, and reporting requirements are incorporated. A draft of the proposed and final initial IHA can be found at <https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act>. We request comment on our analyses, the proposed renewal IHA, and any other aspect of this notice. Please include with your comments any supporting data or literature citations to help

inform our final decision on the request for MMPA authorization.

**SUPPLEMENTARY INFORMATION:**

*Title of Collection:* Survey Screening Questions.

*OMB Control Number:* 3170-00XX.

*Type of Review:* New information collection.

*Affected Public:* Individuals.

*Estimated Number of Respondents:* 50,000.

*Estimated Total Annual Burden Hours:* 12,500.

*Abstract:* The CFPB conducts a variety of research efforts to ascertain financial issues the American public may be experiencing. *Abstract:* The U.S. Department of Education (ED)'s Institute of Education Sciences (IES) requests clearance for data collection activities to evaluate teacher residency programs' contributions to the teacher workforce. Specifically, this request covers the collection of data to understand the extent to which teacher residency programs funded by ED's Teacher Quality Partnership (TQP) grants help diversify the teacher pipeline and fill hard-to-staff teaching positions in their partner districts. The Higher Education Act established the TQP program to support partnerships between teacher preparation programs and high-need districts to implement teacher residency programs. The study will collect data on newly hired teachers from the school districts and charter school networks (referred to throughout as "districts") that partner with TQP grantees. If some districts are unable to provide data on new hires from TQP-funded residency
