

individual parks and regions, along with State agencies, are responsible for managing their fisheries and associated natural resources. This information collection is intended to create a standard Creel Survey that can be used by park units open to recreational and sports fishing. The information collected will allow park managers to assess fishing pressure, angler catch rates, and discern angling's potential effects on park resources.

Creel surveys are a common fishery management technique designed to determine the angler's catch of each species and the fishing time required to catch the fish. The information collected describes angler use, fishing pressure, fish harvest, and distribution of several important species of fish.
