

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA-2024-0002]

Changes in Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, Department of Homeland Security.

ACTION: Notice.

SUMMARY: New or modified Base (1-percent annual chance) Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, and/or regulatory floodways (hereinafter referred to as flood hazard determinations) as shown on the indicated Letter of Map Revision (LOMR) for each of the communities listed in the table below are finalized. Each LOMR revises the Flood Insurance Rate Maps (FIRMs), and in some cases the Flood Insurance Study (FIS) reports, currently in effect for the listed communities.

DATES: Each LOMR was finalized as in the table below.

ADDRESSES: Each LOMR is available for inspection at both the respective Community Map Repository address listed in the table below and online through the FEMA Map Service Center at <https://msc.fema.gov>.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacbibit@fema.dhs.gov; or visit the FEMA Mapping and Insurance eXchange (FMIX) online at https://www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final flood hazard determinations as shown in the LOMRs for each community listed in the table below. Notice of these modified flood hazard determinations has been published in newspapers of local circulation and 90 days have elapsed since that publication. The Deputy Associate Administrator for Insurance and Mitigation has resolved any appeals resulting from this notification.

The modified flood hazard determinations are made pursuant to section 206 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.*, and with 44 CFR part 65. The currently effective community number is shown and must be used for all new policies and renewals.

The new or modified flood hazard information is the basis for the floodplain management measures that the community is required either to adopt or to show evidence of being

already in effect in order to remain qualified for participation in the National Flood Insurance Program (NFIP).

This new or modified flood hazard information, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities.

This new or modified flood hazard determinations are used to meet the floodplain management requirements of the NFIP. The changes in flood hazard determinations are in accordance with 44 CFR 65.4.

Interested lessees and owners of real property are encouraged to review the final flood hazard information available at the address cited below for each community or online through the FEMA Map Service Center at <https://msc.fema.gov>.

BILLING CODE 9110–12–P

DEPARTMENT OF HOMELAND SECURITY

[Docket No. CISA–2024–0025]

Agency Information Collection Activities: Incident Reporting Form

AGENCY: Cybersecurity and Infrastructure Security Agency (CISA), Department of Homeland Security (DHS).

ACTION: 60-Day notice and request for comments; new Information Collection Request, 1670–NEW.

SUMMARY: The Cybersecurity Division (CSD) within the Cybersecurity and Infrastructure Security Agency (CISA) submits the following Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. This is a replacement to an existing collection and is a new collection request. This ICR collects cybersecurity incident reports related to Federal agency information systems, mandatory reports on behalf of certain Federal regulatory agencies, mandatory reports due to contractual requirements, and voluntary reports from members of the public. This ICR, which is authorized by the Federal Information Security Modernization Act of 2014 (FISMA) and the Homeland Security Act, is distinct from incident reporting under the Cyber Incident Reporting for Critical Infrastructure Act (CIRCIA). CISA will use a different information collection instrument for CIRCIA incident reports after the effective date of CIRCIA implementing regulations. The questions included in this package for public review represent the universe of all possible questions CISA may use for incident report information collection purposes across multiple use cases; no respondent will be presented all the questions.

DATES: Comments are encouraged and will be accepted until December 6, 2024.

ADDRESSES: You may submit comments, identified by docket number Docket –CISA–2024–0025, by following the instructions below for submitting comment via the Federal eRulemaking Portal at <http://www.regulations.gov>.

Instructions: All comments received must include the agency name and docket number Docket #CISA–2024–0025. All comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided.

www.regulations.gov, including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT:

Brian DeWynngaert; 202–657–1360;

Brian.dewynngaert@cisa.dhs.gov.

SUPPLEMENTARY INFORMATION: CISA serves as “a Federal civilian interface for the multi-directional and cross-sector sharing of information related to cyber threat indicators, defensive measures, cybersecurity risks, incidents, analysis, and warnings for Federal and non-Federal entities.” 6 U.S.C. 659(c)(1).

CISA is responsible for performing, coordinating, and supporting response to information security incidents, which may originate outside the Federal community and affect users within it, or originate within the Federal community and affect users outside of it. CISA uses the information from incident reports to develop timely and actionable information for distribution to Federal departments and agencies; State, local, Tribal and territorial (SLTT) governments; critical infrastructure owners and operators; private industry; and international organizations. Often, the effective handling of security incidents relies on information sharing among individual users, industry, and the Federal Government, which may be facilitated by and through CISA.

Pursuant to the *Federal Information Security Modernization Act of 2014 (FISMA)*, 44 U.S.C. 3552 *et seq.*, CISA operates the Federal information security incident center for the United States Federal Government. 44 U.S.C. 3556. Federal agencies notify and consult with CISA regarding information security incidents involving Federal information systems. CISA provides Federal agencies with technical assistance and guidance on detecting and handling security incidents, compiles and analyze incident information that threatens information security, informs agencies of current and potential threats and vulnerabilities, and provides intelligence or other information about cyber threats, vulnerabilities, and incidents to agencies. 44 U.S.C. 3556(a). CISA also receives incident reports from non-Federal entities who are reporting to satisfy existing regulatory, statutory, and/or contractual requirements. Finally, CISA receives voluntary incident reports from non-Federal entities.

CISA’s website (at <https://www.cisa.gov/>) is a primary tool used by constituents to report incident

information, access information sharing products and services, and interact with CISA. Constituents, which may include anyone or any entity in the public, use forms located on the website to complete these activities. Incident reports are primarily submitted using CISA’s current Incident Reporting Portal, available at <https://www.cisa.gov/forms/report>. This new collection instrument will replace the current form once the new collection instrument is online and active.

By accepting incident reports and feedback, and interacting among Federal agencies, industry, the research community, State and local governments, and others to disseminate reasoned and actionable cybersecurity information to the public, CISA has provided a way for citizens, businesses, and other institutions to communicate and coordinate directly with the Federal Government about cybersecurity.

Incident reports are collected through the Incident Reporting Portal, which enables end users to report incidents and indicators as well as submit malware artifacts associated with incidents to CISA. This information is used by CISA to conduct analyses and provide warnings of system threats and vulnerabilities, and to develop mitigation strategies as appropriate. This ICR also requests the user’s name, email address, organization, and infrastructure sector. The primary purpose for the collection of this contact and industry information is to allow CISA to contact requestors regarding their report.

In addition to web-based electronic forms, information may be collected through email or telephone. These methods enable individuals, private sector entities, personnel working at other Federal or State agencies, and international entities, including individuals, companies and other nations’ governments to submit information.

This collection of information will replace CISA’s current Incident Reporting Form. There are significant changes to the current set of questions asked. The questions included in this package for public review represent the universe of all possible questions CISA may use for incident report information collection purposes across the multiple use cases outlined above; no respondent will be presented all the questions. In the Incident Reporting Portal respondents will be directed to answer a subset of the questions based on the characteristics of the reporting entity, the reasons for which they are reporting, and the nature of the incident. The dynamic design of the Incident
