

the existing Alternative 2 Expansion Area as identified in the Final EIS. In addition to the Proposed Action, GSA will also consider the No Action Alternative.

The purpose of the Proposed Action is to address stormwater management and flood control needs for the expanded and modernized RHC LPOE. The need for the Proposed Action is that the current alignment of the Rose Avenue Channel will result in engineering conflicts with the current proposed layout for the expanded RHC LPOE and requires re-routing. Additional land area is also required for necessary stormwater retention at the expanded and modernized RHC LPOE.

Preliminary analysis indicates that short-term adverse environmental impacts may occur during construction on air quality and greenhouse gases from emissions; geology and soils and water resources from ground disturbance; and biological resources from ground disturbance and construction noise. GSA will be conducting a jurisdictional determination, archaeological survey, and Phase I Environmental Site Assessment to inform potential impacts to Waters of the United States, cultural resources, and human health and safety, respectively. Minimal or no impacts are expected to occur to the following resources: transportation and traffic; noise; socioeconomics, and environmental justice. Beneficial impacts are expected to infrastructure and utilities from the improvement of stormwater management facilities. The Proposed Action may require acquisition of additional land to the west of the RHC LPOE. Necessary permits and authorizations will be identified within the Draft EIS.

The Draft EIS is expected to be published in early 2025.

*Director, Portfolio Management Division,
