Notice of Inventory Completion: University of Tennessee, Department of Anthropology, Knoxville, TN

AGENCY: National Park Service, Interior.
ACTION: Notice.

SUMMARY: In accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), the University of Tennessee, Department of Anthropology (UTK) has completed an inventory of human remains and associated funerary objects and has determined that there is a cultural affiliation between the human remains and associated funerary objects and Indian Tribes or Native Hawaiian organizations in this notice.

DATES: Repatriation of the human remains and associated funerary objects in this notice may occur on or after November 8, 2024.

ADDRESSES: Dr. Ellen Lofaro, University of Tennessee, Office of Repatriation, 5723 Middlebrook Pike, Knoxville, TN 37921-6053, telephone (865) 974-3370, email nagpra@utk.edu.

SUPPLEMENTARY INFORMATION: This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA. The determinations in this notice are the sole responsibility of UTK, and additional information on the determinations in this notice, including the results of consultation, can be found in its inventory or related records. The National Park Service is not responsible for the determinations in this notice.

Abstract of Information Available

Human remains representing, at least, one individual have been identified. No associated funerary objects are present. On October 27, 1992, the remains were discovered by two children on the side of a road in Bradley County, TN. They notified the police, and on November 11, 1992, a detective from the Bradley County Sheriff's Department contacted William Bass at UTK for his assistance in examining the remains. The detective sent the remains to Bass at UTK, where they were received on November 20. After Bass verified that the remains were not of medicolegal concern (not a missing person or crime victim), and that they were Native American, the remains were retained by the UTK Forensic Anthropology Center (FAC) as case 92-30 where they remained until they were recently transferred to the UTK Office of Repatriation (OR). Some of the remains were "repaired" using an unknown glue, but to our knowledge, the remains were not treated with any potentially hazardous substances.

Human remains representing, at least, one individual have been identified. No associated funerary objects are present. On an unknown date, this individual was removed from an unknown rock shelter in Cumberland County, Tennessee. The shelter reportedly had a
