II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315(b) to grant exemptions from Federal Motor Carrier Safety Regulations (FMCSRs). FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including the applicant's safety analyses. The Agency must provide an opportunity for public comment on the request.

The Agency reviews safety analyses and public comments submitted and determines whether granting the exemption would likely maintain a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305(a)). The Agency must publish its decision in the **Federal Register** (49 CFR 381.315(b)). If granted, the notice will identify the regulatory provision(s) from which the applicant will be exempt, the effective period, and all terms and conditions of the exemption (49 CFR 381.315(c)(1)). If the exemption is denied, the notice will explain the reason for the denial (49 CFR 381.315(c)(2)). The exemption may be renewed (49 CFR 381.300(b)).

III. Applicant's Request

Daimler has applied for a 5-year exemption for six drivers from 49 CFR 383.23, which requires that drivers operating CMVs in interstate or intrastate commerce hold CDLs issued by a State. Daimler requests the exemption because these drivers are not residents of a U.S. State, and therefore cannot meet the residency requirement for a CDL and are eligible only for non-domiciled CDLs. The Daimler drivers are Christopher Kappes, Andreas Munch, Franz-Alexander Baumgartner, Fabian Schab, Malte Kleindick, and Lucas Jung. These drivers all hold valid German CDLs. Daimler asserts in its

exemption request that the requirements for a German CDL ensure that the same level of safety is met or exceeded as if these drivers had a CDL issued by a U.S. State.

The requested exemption would allow these six drivers to operate CMVs in interstate commerce to support Daimler field tests for developing and optimizing the control software that governs the high-voltage functions of an electric vehicle's powertrain. According to Daimler, these drivers will perform safety testing and validation that is crucial for powertrain controllers in electric trucks, ensuring they can handle high-voltage functions safely and maintain system performance under diverse driving conditions. In all cases, they will be accompanied by a holder of a CDL issued by a State who is familiar with the routes to be traveled. Daimler adds that if this exemption is not granted, future vehicle development and launch of electric trucks could be hindered as these six individuals play a crucial role in directing company resources to the development of new and advanced powertrain solutions.

A copy of Daimler's application for exemption is available for review in the docket for this notice.

IV. Request for Comments

In accordance with 49 U.S.C. 31315(b), FMCSA requests public comment from all interested persons on Daimler's application for an exemption from the requirement in 49 CFR 383.23. All comments received before the close of business on the comment closing date indicated at the beginning of this notice will be considered and will be available for examination in the docket at the location listed under the Addresses section of this notice. Comments received after the comment closing date will be filed in the public docket and will be considered to the extent practicable. In addition to late comments, FMCSA will also continue to file, in the public docket, relevant information that becomes available after the comment closing date. Interested persons should continue to examine the public docket for new material.
