SUPPLEMENTARY INFORMATION: PHMSA received a special permit request from GTN dated March 27, 2024, seeking a waiver from the federal pipeline safety regulations in 49 CFR 192.611 and 192.619, where gas transmission pipeline segments have undergone changes from Class 2 to Class 3 locations. The special permit request is for two segments of GTN's 36-inch diameter Mainline A natural gas transmission pipeline, approximately 2.075 miles (10,954 feet) in length, in Idaho. This special permit request, if granted, would allow GTN to operate the two segments at the current operating pressure of 911 pounds per square inch gauge by implementing enhanced integrity management procedures in lieu of confirming or revising the maximum allowable operating pressure of the affected segments when there is a class location change under 49 CFR 192.611.

The special permit request, proposed special permit with conditions, and draft environmental assessment (DEA) for the above described GTN pipeline segments are available for review and public comment in Docket No. PHMSA–2024–0055. PHMSA invites interested persons to review and submit comments on the special permit request and DEA in the docket. Please submit comments on any potential safety, environmental, and other relevant considerations implicated by the special permit request. Comments may include relevant data.

Before issuing a decision on the special permit request, PHMSA will evaluate all comments received on or before the comment closing date. Comments received after the closing date will be evaluated if it is possible to do so without incurring additional expense or delay. PHMSA will consider each relevant comment it receives in making its decision to grant or deny this special permit request.

Issued in Washington, DC, under authority delegated in 49 CFR 1.97.

Alan K. Mayberry,

Associate Administrator for Pipeline Safety.
