Abstract: GreenChill is a voluntary partnership program sponsored by EPA that encourages food retailers and manufacturers to adopt cost effective technologies and practices that reduce refrigerant emissions and improve operational efficiency. The GreenChill Program works with the food retail industry to lower barriers inhibiting the implementation of technologies and practices that reduce refrigerant emissions. The Program effectively promotes the adoption of emission reduction practices and technologies by engaging GreenChill Partners to set an annual refrigerant emission reduction goal and develop a refrigerant management plan reflecting the company's implementation objectives. Implementation of the Partners' refrigeration management plan to reduce refrigerant emissions enhances the protection of the environment and may

save Partners money and improve operational efficiency. The GreenChill Program offers the opportunity for any individual store to earn GreenChill Certification when it demonstrates that the amount of refrigerant used is below a specified limit, based on the store's MBTU/hour cooling load, that the refrigerant emitted from the store in the prior 12 months is below a specified level, and that in certain cases the store employs additional advanced technology, training, and other best practices. Information submitted for the certification of individual stores is compared to set criteria. The certification of a store provides the opportunity for broad recognition within the food retail industry and with the store's customers.
