Panel Member List for Hydropower; Licensing Study Dispute Resolution; Notice Requesting Applications for Panel Members for Hydropower Licensing Study Dispute Resolution

This notice requests applications from those interested in being listed as potential panel members to assist in the Federal Energy Regulatory Commission's (Commission) study dispute resolution process for the integrated licensing process (ILP) of hydropower projects.

Background

The Commission's ILP regulations pertaining to hydroelectric licensing under the Federal Power Act encourages informal resolution of study disagreements. In cases where this is not successful, a formal study dispute resolution process is available for state and federal agencies or Indian tribes with mandatory conditioning authority.¹

The ILP provides that the disputed study must be submitted to a dispute resolution panel consisting of a person from Commission staff, a person from the agency or Indian tribe referring the

dispute to the Commission, and a third person selected by the other two panelists from a pre-established list of persons with expertise in the disputed resource area.² The third panel member (TPM) will serve without compensation, except for certain allowable travel expenses to be borne by the Commission (41 CFR part 301).

The role of the panel members is to make a finding, with respect to each disputed study request, on the extent to which each study criteria set forth in the regulations is or is not met,³ and why. The panel will then make a recommendation to the Director of the Office of Energy Projects based on the panel's findings.

TPMs can only be selected from a list of qualified persons (TPM list) that is developed and maintained by the Commission. This notice seeks additional members for the TPM list, which was originally compiled in 2004, 2010, and 2015. Current members of the TPM list do not need to reapply but are encouraged to update their qualifications and contact information, if not current. Each qualified panel member will be listed by area(s) and sub-area(s) of technical expertise, for example Aquatic Resources—instream flows.
