

- The MOS must submit a draft report detailing all monitoring within 90 calendar days of the completion of marine mammal monitoring or 60 days prior to the issuance of any subsequent IHA for this project, whichever comes first;
- The MOS must prepare and submit final report within 30 days following resolution of comments on the draft report from NMFS;
- The MOS must submit all PSO datasheets and/or raw sighting data (in a separate file from the Final Report referenced immediately above); and
- The MOS must report injured or dead marine mammals.

Comments and Responses

As noted previously, NMFS published a notice of a proposed IHA and proposed modified IHA (88 FR 23627, April 18, 2023; 89 FR 22684, April 2, 2024) and solicited public comments on both our proposal to issue the initial IHA for Skagway Ore Terminal Redevelopment project and on the potential for a renewal IHA, should certain requirements be met. During the 30-day public comment period, NMFS received no substantive comments on either the proposal to issue the initial IHA for MOS's construction activities or on the potential for a renewal IHA.

Preliminary Determinations

The proposed renewal request consists of a subset of activities analyzed through the initial authorization described above. In analyzing the effects of the activities for the initial IHA, NMFS determined that MOS's activities would have a negligible impact on the affected species or stocks and that authorized take numbers of each species or stock were small relative to the relevant stocks (e.g., less than one-third the abundance of all stocks). The mitigation measures and monitoring and reporting requirements as described above are substantially similar to those required through initial IHA; hydroacoustic monitoring is excluded because it was completed under the initial IHA, and the shutdown zones have been revised to reflect the piles to be driven in the proposed subset of work. The minor changes described above do not affect the least practicable adverse impact determinations.

NMFS has preliminarily concluded that there is no new information suggesting that our analysis or findings should change from those reached for the initial IHA. Based on the information and analysis contained here and in the referenced documents, NMFS has preliminarily determined the following: (1) the required mitigation

measures will effect the least practicable impact on marine mammal species or stocks and their habitat; (2) the authorized takes will have a negligible impact on the affected marine mammal species or stocks; (3) the authorized takes represent small numbers of marine mammals relative to the affected stock abundances; (4) MOS's activities will not have an unmitigable adverse impact on taking for subsistence purposes as no relevant subsistence uses of marine mammals are implicated by this action; and (5) appropriate monitoring and reporting requirements are included.

Endangered Species Act

The NMFS Alaska Regional Office issued a Biological Opinion under section 7 of the Endangered Species Act (ESA; 16 U.S.C. 1531 *et seq.*) on the issuance of an IHA and potential renewal IHA to MOS under section 101(a)(5)(D) of the MMPA by the NMFS OPR. The Biological Opinion concluded that the action is not likely to jeopardize the continued existence of ESA-listed humpback whales or Steller sea lions.

Proposed Renewal IHA and Request for Public Comment

As a result of these preliminary determinations, NMFS proposes to issue a renewal IHA to MOS for conducting the terminal redevelopment construction in Skagway, Alaska, from the date of issuance through September 30, 2025, provided the previously described mitigation, monitoring, and reporting requirements are incorporated. A draft of the proposed and final initial IHA and modified IHA can be found at <https://www.fisheries.noaa.gov/action/incidental-take-authorization-municipality-skagways-skagway-ore-terminal-redevelopment>. We request comment on our analyses, the proposed renewal IHA, and any other aspect of this notice. Please include with your comments any supporting data or literature citations to help inform our final decision on the request for MMPA authorization.
