

part 52, subpart (C), and CC Docket No. 95–116.

*Form Number:* N/A.

*Type of Review:* Revision of a currently approved collection.

*Respondents:* Business or other for profit entities.

*Number of Respondents and Responses:* 1,626 respondents; 13,672,050 responses.

*Estimated Time per Response:* 0.0666 hours–60 hours.

*Frequency of Response:* On occasion and one-time reporting requirements, recordkeeping requirement, and third party disclosure requirement.

*Obligation to Respond:* Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 151, 152, 154(i), 201–205, 215, 251(b)(2), 251(e)(2) and 332 of the Communications Act of 1934, as amended.

*Total Annual Burden:* 792,235 hours.

*Total Annual Cost:* No cost.

*Needs and Uses:* Section 251(b)(2) of the Communications Act of 1934, as amended, requires LECs to “provide, to the extent technically feasible, number portability in accordance with requirements prescribed by the Commission.” Through the LNP process, consumers have the ability to retain their phone number when switching telecommunications service providers, enabling them to choose a provider that best suits their needs and enhancing competition. In the Porting Interval Order and Further Notice, the Commission mandated a one business day porting interval for simple wireline-to-wireline and intermodal port requests. The information collected in the standard local service request data fields is necessary to complete simple wireline-to-wireline and intermodal ports within the one business day porting interval mandated by the Commission and will be used to comply with Section 251 of the Telecommunications Act of 1996.

On November 16, 2023, the FCC released a *Report and Order and Further Notice of Proposed Rulemaking* (88 FR 85794 (Dec. 8, 2023)) (*SIM Swap and Port-Out Fraud Order*), which adds new information collection requirements. The *SIM Swap and Port-Out Fraud Order* adopted baseline measures to increase protections for customers against fraudulent port-outs by adding new section 52.37 in Part 52, and adds new information collection requirements in paragraphs (c), (e), and (g), of that rule. Port-out fraud occurs where a bad actor impersonates a customer of a wireless provider and convinces the provider to port the real customer’s telephone number to a new

wireless provider and a device that the bad actor controls, allowing a bad actor to control the victim’s mobile account and receive text messages and phone calls intended for the victim. The new rules establish a uniform framework that gives wireless providers flexibility to implement customer authentication and security methods to address port-out fraud. Wireless providers are required to comply with the new or modified rules except where the Safe Connections Act requires alternate procedures to be used. The *SIM Swap and Port-Out Fraud Order* modifies the existing Local Number Portability collection requirements to require wireless providers to: (1) immediately notify customers of any requests for a port-out request associated with the customer’s account before effectuating the request; (2) provide customers with advance notice of any account protection measures offered; and (3) maintain a clear process for customers to report fraudulent number ports, and promptly provide customers with documentation of fraudulent ports involving their accounts.
