

Environmental Review

Each of the RODs summarizes the findings of the Plan-EIS; these are not programmatic. Each ROD provides the basis for the NRCS decision. NRCS is the lead Federal agency responsible for the content and quality of the Plan-EIS for the purposes of National Environmental Policy Act (NEPA), Principles, Requirements, and Guidelines (PR&G) for Federal Investments in Water Resources and National Historic Preservation Act (NHPA) compliance.

Each ROD is issued as specified by the NEPA process (42 U.S.C. 4321–4347) which follows the NRCS NEPA regulations in 7 CFR part 650, subpart A, and 7 CFR part 622. The NRCS NEPA regulations adopt the Council of Environmental Quality (CEQ) NEPA regulations (40 CFR parts 1500–1508) in total.

SUPPLEMENTARY INFORMATION:

I. Abstract

During the years preceding the 2030 Census, the Census Bureau will pursue its commitment to developing a well-managed, cost-effective, and high-quality decennial census. The Census Bureau will streamline data collection processes and implement new and improved methods to count the U.S. population for the 2030 Census. This includes new and improved methods for counting individuals residing in Group Quarters (GQs), such as college/university student housing, residential treatment centers, nursing/skilled-nursing facilities, group homes, correctional facilities, hospitals, and military barracks. GQ Administrators play a vital role in GQ data collection during Group Quarters Advance Contact. They provide critical updates about the facility and residents. One of the new data collection methods is to test the capability to allow GQ Administrators to electronically review, verify and update address and other frame information associated with their GQs, as well as to select a method of enumeration for their residents. The 2026 Census Test will enable the Census Bureau to test revisions to the capability to receive and extract verified and updated GQ address information electronically into a useful format prior to the subsequent Group Quarters Enumeration (GQE) operation. The specific data items that GQ Administrators will review include GQ type code, primary and secondary GQ contact name, title, telephone number and email address, name of the GQ, address of GQ, maximum number of people who could live/stay in the GQ
