

and by whom, who gets evaluated, and who gets placed on the organ transplantation waiting list. These data will also facilitate the OPTN’s ability to address disparities in processes of care, improve access to organ transplantation, and assess overall system performance.

Once this collection is approved, HRSA will cease the use of the Death Notification Registration and the Deceased Donor Death Referral forms that are included within the existing OMB-approved Data System for Organ Procurement and Transplantation Network OMB No. 0915–0157. This

decision was made to avoid unnecessary burden and redundancy in the data collected by this package and the existing OMB data collection instrument.

Likely Respondents: Transplant Centers, OPOs, and Histocompatibility Laboratories.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install and utilize

technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form No.	Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
1	Pre-Waitlist Transplant Referral Form	248	1,164.68	288,840.64	0.35	101,094.22
2	Pre-Waitlist Transplant Evaluation Form	248	594.22	147,366.56	0.40	58,946.62
3	Ventilated Patient Form	56	3,292.00	184,352.00	0.50	92,176.00
Total	552	620,559.20	252,216.84

The average burden estimates of both new pre-waitlist forms are based on the 2023 burden estimates of existing OMB-approved Transplant Candidate Registration forms, approved under 0915–0157. The average burden estimate of the Ventilated Patient Form is based on the average burden estimate of the 2024 burden estimates of existing OMB-approved Death Notification Registration form with an additional 0.08 hour per collected form burden to reflect an increase in total data fields.

HRSA specifically requests comments on: (1) the necessity and utility of the proposed information collection for the proper performance of the agency’s functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.
