

requests for similar information collections related to these activities.

As this generic umbrella ICR will focus on the awareness, understanding, attitudes, preferences, or experiences of customers or other stakeholders relating to HRSA-funded hotlines, chatlines, or portals, the Fast Track Process should apply to this information collection. Therefore, HRSA also requests OMB provide a response on individual information collection requests within the scope of this generic ICR within 5 business days.

Likely Respondents: The most likely respondents include users of a HRSA-funded hotline, chatline, or portal.

These users may include members of the public and public or private entities who receive HRSA funding. Responses to any information collections under this generic umbrella ICR are not required to obtain or retain any benefit.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose, or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing

and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information.

The total annual burden hours estimated for this ICR are summarized in the table below. HRSA conducted this estimate based on reviewing hotline and chatline scripts along with online portals, in addition to reviewing the burden estimates of forms from previous HRSA customer service surveys, which were approved under other umbrella or regular packages.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Instrument name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Standardized Hotline Interaction	100,000	1	100,000	0.17	17,000.00
Standardized Chatline Interaction	100,000	1	100,000	0.17	17,000.00
Online Portal Submission	10,000	1	10,000	0.067	670.00
Follow-Up Surveys	51,750	1	51,750	0.083	4,295.25
Total	261,750	261,750	38,965.25

HRSA specifically requests comments on: (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a summary of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (240) 276-0166.

Project: Government Performance and Results Act (GPRA) Client/Participant Outcomes Measure—(OMB No. 0930-0208)—Revision

SAMHSA is requesting approval for a revision of the CSAT Client-level GPRA instrument to continue the collection of performance and program monitoring data of its substance use services grant programs. Currently, the information collected from this instrument is entered and stored in SAMHSA's Performance Accountability and Reporting System (SPARS). SPARS is a real-time, performance management system that captures information on the substance use services and mental health services delivered through SAMHSA's grant programs across the United States. Continued approval of this information collection will allow SAMHSA to continue to meet Government Performance and Results Modernization Act of 2010 reporting requirements that quantify the effects and accomplishments of its discretionary grant programs, which are consistent with OMB guidance.

SAMHSA will use the data for annual performance reporting required by GPRA and comparing baseline with discharge and follow-up data. The additional information collected through this process will allow SAMHSA to: (1) report results of these performance outcomes; (2) maintain consistency with SAMHSA-specific performance domains, and (3) assess the performance of its discretionary and formula grant programs.

Currently, there are 379,037 total burden hours in the OMB-approved CSAT Client-level GPRA instrument. SAMHSA is now requesting an increase to 631,682 burden hours. The increase of 252,645 burden hours is due to the following:

- Additional time allocated for interviews, but also improved estimates
