I. Summary of the Proposed Actions

On July 8, 2024, the EPA proposed two actions related to the CAA requirements for the 1997 annual PM_{2.5} NAAQS in the San Joaquin Valley Serious nonattainment area.

In the first action, under CAA section 110(k)(3), the EPA proposed to approve through parallel processing the “Amendments to the 15 µg/m³ SIP Revision and Agricultural Equipment Incentive Measure for the 1997 PM_{2.5} Standard” (“15 µg/m³ Plan Amendments”) as a revision to the California SIP.¹ The 15 µg/m³ Plan Amendments seek to amend a SIP-approved measure, the “Accelerated Turnover of Agricultural Equipment Incentive Projects” (“Valley Incentive Measure”), to include a quantification of the emissions reductions for the year 2023 from existing agricultural equipment projects from the California Air Resources Board’s (CARB’s) Carl

Moyer Memorial Air Quality Standards Attainment Program (“Carl Moyer”) and CARB’s Funding Agricultural Replacement Measures for Emission Reductions (FARMER) program and seek EPA approval of those emission reductions for SIP credit. The 15 µg/m³ Plan Amendments also seek to revise the aggregate tonnage commitment in the attainment plan for the 1997 annual PM_{2.5} NAAQS (i.e., the “Attainment Plan Revision for the 1997 Annual PM_{2.5} Standard” (“15 µg/m³ SIP Revision”)) by replacing it with a commitment to achieve the same reductions from the Valley Incentive Measure. As part of the EPA’s proposal to approve the 15 µg/m³ Plan Amendments, we proposed to approve the State’s demonstration that the Valley Incentive Measure has achieved emissions reductions of 5.0 tons per day (tpd) of nitrogen oxides (NO_x) and 0.27 tpd of direct PM_{2.5} in the year 2023, and proposed to credit the reductions as a substitute measure to meet the aggregate tonnage commitment in the 15 µg/m³ SIP Revision.²

In the second action, based in part on our proposal to approve the 15 µg/m³ Plan Amendments, the EPA proposed to grant California’s request for a one-year extension of the applicable attainment date from December 31, 2023, to December 31, 2024, for the 1997 annual PM_{2.5} San Joaquin Valley, California, nonattainment area.³ The proposed action to extend the applicable attainment date for this nonattainment area was based on the EPA’s evaluation of air quality monitoring data and extension request submitted by the State of California, and our determination that the State has satisfied the two statutory criteria for a one-year extension under CAA section 172(a)(2)(C): The State has complied with all requirements and commitments pertaining to the area in the applicable implementation plan, and in accordance with guidance published by the Administrator, no more than the minimal number of exceedances of the relevant national ambient air quality standard has occurred in the area in the year preceding the Extension Year.

For details regarding the EPA’s reasons for proposing to approve the 15 µg/m³ Plan Amendments and to grant the one-year extension, please see the July 8, 2024 proposal notices.⁴

On August 22, 2024, California submitted the final version of the 15 µg/m³ Plan Amendments to the EPA as a
