

accident. Therefore, the requirements of 10 CFR 51.22(c)(25)(v) are met.

Requirements in 10 CFR 51.22(c)(25)(vi)

To qualify for a categorical exclusion under 10 CFR 51.22(c)(25)(vi)(G), the exemption must involve scheduling requirements. The exemption involves scheduling requirements because it would allow Constellation to submit an SLRA for FitzPatrick at least 3 years prior to the expiration of the existing license, rather than the 5 years specified in 10 CFR 2.109(b), and still place the license in timely renewal under 10 CFR 2.109(b). Therefore, the requirements of 10 CFR 51.22(c)(25)(vi) are met.

Based on the above, the NRC concludes that the proposed exemption meets the eligibility criteria for a categorical exclusion set forth in 10 CFR 51.22(c)(25). Therefore, pursuant to 10 CFR 51.22(b), no environmental assessment or environmental impact statement need be prepared in connection with the approval of this exemption request.

IV. Conclusions

Accordingly, the NRC has determined that, pursuant to 10 CFR 54.15 and 10 CFR 50.12, the requested exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. Also, special circumstances, as defined in 10 CFR 50.12(a)(2)(ii), are present. Therefore, the NRC hereby grants the licensee a one-time exemption such that if the licensee submits an SLRA for FitzPatrick at least 3 years prior to the expiration of the existing operating license, and if the NRC staff finds it acceptable for docketing, the existing operating license will be in timely renewal under NRC regulations until the NRC has made a final determination on whether to approve the SLRA.

This exemption is effective upon issuance.

Draft NUREG: Report on Waste Burial Charges: Changes in Decommissioning Waste Disposal Costs at Low-Level Waste Burial Facilities

AGENCY: Nuclear Regulatory Commission.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment a draft report entitled, NUREG-1307, Revision 20, "Report on Waste Burial Charges: Changes in Decommissioning Waste Disposal Costs at Low-Level Waste Burial Facilities." This report, which is revised periodically, explains the formula acceptable to the NRC for determining the minimum decommissioning fund requirements for nuclear power reactor licensees, as required by NRC regulations. Specifically, this report provides the adjustment factor and updates the values for the labor, energy, and waste burial escalation factors of the minimum formula.

DATES: Submit comments by December 19, 2024. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received before this date.

II. Discussion

Pursuant to section 50.75 of title 10 of the *Code of Federal Regulations* (10 CFR), "Reporting and recordkeeping for decommissioning planning," the NRC requires nuclear power reactor licensees to adjust annually, in current year dollars, their estimate of the cost to decommission their plants. The annual updates are part of the process for providing reasonable assurance that adequate funds for decommissioning will be available when needed.

Revision 20 of NUREG-1307, "Report on Waste Burial Charges: Changes in Decommissioning Waste Disposal Costs at Low-Level Waste Burial Facilities," modifies the previous revision to this report issued in February 2023 (ADAMS Accession No. ML23044A207) and incorporates updates to the labor, energy, and waste burial escalation factors of the NRC minimum decommissioning fund formula. Due to moderately lower low-level waste (LLW) burial charges at two of the nation's four LLW disposal facilities to which a majority of licensees are anticipated to dispose some portion of their LLW, and slightly to moderately higher charges at the remaining two facilities to which a small number of licensees are anticipated to dispose of their LLW, the minimum decommissioning fund formula amounts calculated by licensees, based on revised LLW burial factors presented in this report, will likely reflect minimum decommissioning fund requirements that are lower, on average, when compared to those previously reported by licensees in 2023.
