BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA-2019-0064]

Petition for Extension and Modification of Waiver of Compliance

Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that by letters dated August 27, 2024, and October 15, 2024, BNSF Railway Company (BNSF) petitioned the Federal Railroad Administration (FRA) for an extension of a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 232 (Brake System Safety Standards for Freight and Other Non-Passenger Trains and Equipment; End-of-Train Devices). BNSF also petitioned to add three locations to the waiver: Auburn, Washington; Lincoln, Nebraska; and Missoula, Montana. The relevant Docket Number is FRA-2019-0064.

Specifically, BNSF requests to renew the existing waiver from 49 CFR 232.305(b)(2), *Single car air brake tests*, which permits BNSF to change the repair track designation (per § 232.303, *General requirements*) so that the track on which in-train wheel replacements are performed is not designated a shop or repair track. Accordingly, a single car air brake test (SCABT) is not required on each car undergoing an in-train wheelset replacement, but BNSF proposes to perform a SCABT on any car with an FRA-condemnable wheel

defect as defined in § 232.303(b)(5). The relief currently applies to specific yard tracks for wheelset replacement at three BNSF facilities: Newton, Kansas; Kansas City, Kansas; and Temple, Texas. BNSF seeks to expand the waiver to apply to Auburn, Washington; Lincoln, Nebraska; and Missoula, Montana, as well.

In support of its request, BNSF stated that the program “has significantly reduced the number of wheels in service with elevated kip impact readings, which, in turn has a long-term positive impact on rail integrity.” Additionally, BNSF explained that “by using [Wheel Impact Load Detectors] and replacing wheelsets with relatively minor defects, BNSF has replaced significantly more wheelsets than required by FRA regulations.”

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested parties desire an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted at www.regulations.gov. Follow the online instructions for submitting comments.

Communications received by January 21, 2025 will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable.

Anyone can search the electronic form of any written communications and comments received into any of the Department of Transportation's (DOT) dockets by the name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). Under 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its processes. BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA-2024-0115]

Petition for Waiver of Compliance

Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that by letters received October 1, 2024, and November 4, 2024, the City of North Salt Lake (the City) petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 222 (Use of Locomotive Horns at Public Highway-Rail Grade Crossings). FRA assigned the petition Docket Number FRA-2024-0115.

Specifically, the City requests relief from § 222.35(b)(1), *What are the minimum requirements for quiet zones?—Active grade crossing warning devices*, which states that each public highway-rail grade crossing in a quiet zone “must be equipped, no later than the quiet zone implementation date, with active grade crossing warning devices comprising both flashing lights and gates which control traffic over the crossing.” The City requests a two-year waiver from the regulation “until the design and construction of the relocated signal mast and gate arm can be completed.”

In support of its request, the City stated that the signal mast and gate arm are currently located before the crossing on an industrial spur, where trains are operated at not more than 10 miles per hour. The crossing currently has signal lights, and the City will add a painted stop bar and sign reading “STOP HERE WHEN FLASHING” to “further improve the safety at the crossing . . . until the design and construction of the gate arm can be completed.” The City further explained that funding for the project has been secured and that granting this relief will allow “reinstatement of the quiet zone while design, approval and construction of the gate arm is completed.”

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted at www.regulations.gov. Follow the online instructions for submitting comments.

Communications received by January 21, 2025 will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable. Anyone can search the electronic form of any written communications and comments received into any of the U.S.

Department of Transportation's (DOT) dockets by the name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA-2019-0042]

Petition for Extension of Waiver of Compliance

Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that by letter dated October 8, 2024, Buffalo & Pittsburgh Railroad, Inc. (BPRR) petitioned the Federal Railroad Administration (FRA) for an extension

of a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 240 (Qualification and Certification of Locomotive Engineers) and part 242 (Qualification and Certification of Conductors). The relevant Docket Number is FRA-2019-0042.

Specifically, BPRR requests relief required to continue participation in FRA's Confidential Close Call Reporting System (C³RS) Program. BPRR seeks to continue shielding reporting employees from mandatory punitive sanctions that would otherwise arise as provided in §§ 240.117(e)(1)-(4); 240.305(a)(1)-(4) and (a)(6); 240.307; 242.403(b), (c), (e)(1)-(4), (e)(6)-(11), (f)(1)-(2); and 242.407. The C³RS Program encourages certified operating crew members to report close calls and protects the employees and the railroad from discipline or sanctions arising from the incidents reported per the C³RS Implementing Memorandum of Understanding (IMOU).

In support of its request, the petition stated that BPRR's benefits from the C³RS program have prompted "other railroad subsidiaries under Genesee & Wyoming [Inc.] . . . to adopt C³RS." BPRR also stated that itself and "participating parties continue to believe that the C³RS program provides tangible benefits and improves employee and public safety."

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested parties desire an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted at www.regulations.gov. Follow the online instructions for submitting comments.

Communications received by January 21, 2025 will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable.

Anyone can search the electronic form of any written communications and comments received into any of the Department of Transportation's (DOT) dockets by the name of the individual

submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA-2024-0004]

Agency Information Collection Activities; Notice and Request for Comment; National Roadside Survey of Alcohol and Drug Prevalence of Road Users: 2025

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice and request for public comment on proposed new collection of information.

SUMMARY: The National Highway Traffic Safety Administration (NHTSA) invites public comments about our intention to request approval from the Office of Management and Budget (OMB) for a new information collection. Before a Federal agency can collect certain information from the public, it must receive approval from OMB. Under procedures established by the Paperwork Reduction Act of 1995, before seeking OMB approval, Federal agencies must solicit public comment on proposed collections of information, including extensions and reinstatement of previously approved collections. This document describes a collection of information for which NHTSA intends to seek OMB approval for a National Roadside Survey (NRS) of alcohol and other drug prevalence among drivers and other road users (ORUs; e.g., pedestrians, bicyclists, electric scooter riders, and those with mobility aids. NHTSA will conduct two studies. Study 1 will focus on drivers but include
