SUPPLEMENTARY INFORMATION:

I. Background

In accordance with section 51.118 of title 10 of the *Code of Federal Regulations* (10 CFR), “Final environmental impact statement—notice of availability,” the NRC is making available for public inspection NUREG–1437, Supplement 26, Second Renewal, regarding the subsequent license renewal of Northern States Power Company doing business as Xcel Energy (Xcel), renewed Facility Operating License No. DPR–22 for an additional 20 years of operation for Monticello. A notice of availability of the site-specific draft EIS (DEIS) (NUREG–1437, Supplement 26, Second Renewal) was published in the **Federal Register** on April 24, 2024 (89 FR 31225). The U.S. Environmental Protection Agency (EPA) issued its Notice of Availability on April 19, 2024 (89 FR 28771). To align the end of EPA’s comment period with the NRC’s comment period, on May 3, 2024 (89 FR 36815), the public comment period was initially extended from June 3, 2024, to June 10, 2024. On June 5, 2024 (89 FR 48196), the NRC staff extended the public comment period by 15 days to June 25, 2024, and on June 14, 2024, EPA also noticed the extension of the comment period to June 25, 2024 (89 FR 50586) to allow more time for members of the public to develop and submit their comments. The public comment period on the site-specific DEIS (NUREG–1437, Supplement 26, Second Renewal) ended on June 25, 2024, and the comments received on the site-specific DEIS are addressed in the final EIS (NUREG–1437, Supplement 26, Second Renewal).

II. Discussion

The site-specific draft EIS (NUREG–1437, Supplement 26, Second Renewal) was issued for public comment on April 24, 2024 (89 FR 31225). The site-specific final EIS addresses the comments received on the site-specific draft EIS (NUREG–1437, Supplement 26, Second Renewal). As discussed in Chapter 4 of the final EIS (NUREG–1437, Supplement 26, Second Renewal), the NRC staff has determined that the adverse environmental impacts of SLR for Monticello (*i.e.*, the continued operation of Monticello for a period of 20 years beyond the expiration date of the initial renewed license) are not so great that preserving the option of SLR for energy-planning decision-makers would be unreasonable. This recommendation is based on: (1) information provided in the environmental report, as supplemented, and other documents submitted by Xcel;

(2) consultation with Federal, State, Tribal, and local governmental agencies; (3) the NRC staff’s independent environmental review; (4) consideration of public comments received during the scoping process, on the site-specific DEIS (NUREG–1437, Supplement 26, Second Renewal); and (5) consideration of public comments received on the site-specific draft EIS (NUREG–1437, Supplement 26, Second Renewal).

Dated: November 18, 2024.

Theodore Smith,

Acting Deputy Director, Division of Rulemaking, Environmental, and Financial Support, Office of Nuclear Material Safety and Safeguards.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2023–0201 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website*: Go to <https://www.regulations.gov> and search for Docket ID NRC–2023–0201.

- *NRC’s Agencywide Documents Access and Management System (ADAMS)*: You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, at 301–415–4737, or by email to PDR.Resource@nrc.gov. The supporting statement is available in ADAMS under Accession No. ML24193A296.

- *NRC’s PDR*: The PDR, where you may examine and order copies of publicly available documents, is open by appointment. To make an appointment to visit the PDR, please send an email to PDR.Resource@nrc.gov or call 1–800–397–4209 or 301–415–4737, between 8 a.m. and 4 p.m. eastern time (ET), Monday through Friday, except Federal holidays.

- *NRC’s Clearance Officer*: A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC’s Clearance Officer, David Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: Infocollects.Resource@nrc.gov.

B. Submitting Comments

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to <https://www.reginfo.gov/public/do/PRAMain>. Find this particular information collection by selecting “Currently under Review—Open for Public Comments” or by using the search function.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at <https://www.regulations.gov> and entered into ADAMS. Comment submissions are not

routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, “Requirements for Renewal of Operating Licenses for Nuclear Power Plants.” The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on June 27, 2024, 89 FR 53662.

1. *The title of the information collection*: Requirements for Renewal of Operating Licenses for Nuclear Power Plants.

2. *OMB approval number*: 3150–0155.

3. *Type of submission*: Extension.

4. *The form number, if applicable*: Not applicable.

5. *How often the collection is required or requested*: There is a one-time application for any licensee wishing to renew the operating license for its nuclear power plant. There is a one-time requirement for each licensee with a renewed operating license to submit a letter documenting the completion of inspection and testing activities. All holders of renewed licenses must perform yearly record keeping.

6. *Who will be required or asked to respond*: Commercial nuclear power plant licensees who wish to renew their operating licenses and holders of renewed licenses.

7. *The estimated number of annual responses*: 75 (13 reporting responses + 62 recordkeepers).

8. *The estimated number of annual respondents*: 69 (7 reporting respondents + 62 recordkeepers).

9. *The estimated number of hours needed annually to comply with the information collection requirement or request*: 323,818 hours (255,818 hours

reporting plus 68,000 hours recordkeeping).

10. *Abstract*: Part 54 of title 10 of the *Code of Federal Regulations* (10 CFR) establishes license renewal requirements for commercial nuclear power plants and describes the information that licensees must submit to the NRC when applying for a license renewal. The application must contain information on how the licensee will manage the detrimental effects of age-related degradation on certain plant systems, structures, and components to continue the plant’s safe operation during the renewal term. The NRC needs this information to determine whether the licensee’s actions will be effective in assuring the plants’ continued safe operation during the period of extended operation. Holders of renewed licenses must retain in an auditable and retrievable form, for the term of the renewed operating license, all information and documentation required to document compliance with 10 CFR part 54. The NRC needs access to this information for continuing effective regulatory oversight.

Dated: November 18, 2024.
