The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on September 11, 2024, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

To that end, the Census Bureau requests OMB approval for a new generic clearance to conduct a series of studies to research and evaluate how to improve data collection activities for 2030 Census programs at the Census Bureau. These studies will explore how the Census Bureau can improve efficiency, data quality, and response rates and reduce respondent burden in future census and survey operations, evaluations and experiments. This

research program is for database updates, respondent communication, questionnaire and procedure development and evaluation purposes. We will use data tabulations to evaluate the results of questionnaire testing. Data will also be used to update address databases and other datasets used to plan and conduct larger tests and the 2030 Census itself.
