Total Annual Burden: 2,878 hours.

Total Annual Cost: \$1,763,375.

Needs and Uses: FCC Form 608 is a multi-purpose form. It is used to provide notification or request approval for any spectrum leasing arrangement (“Lease”) entered into between an existing licensee in certain Wireless and/or Public Safety Radio Services and a spectrum lessee. This form also is required to notify or request approval for any spectrum subleasing arrangement (“Sublease”). The data collected on the form is used by the FCC to determine whether the public interest would be served by the Lease or Sublease. The form is also used to provide notification for any Private Commons Arrangement entered into between a licensee, lessee, or sublessee and a class of third-party users (as defined in section 1.9080 of the Commission's Rules).

The Commission is revising this form to collect information in order to confirm that satellite service operators and terrestrial service providers who seek to enter lease agreements in order to offer supplemental coverage from space (SCS) do so in compliance with the rules that govern SCS operations. On March 15, 2024, the Commission released the Report and Order, which adds new § 1.9047(d)(2) to the Commission's rules requiring the spectrum lessee or sublessee seeking to engage in spectrum leasing under this section to provide certain information within the Commission Form 608 when seeking a leasing agreement to provide SCS. Applicants will file Form 608 into the Commission's Universal Licensing System (ULS) database.

The Commission anticipates that SCS will enable consumers in areas not covered by terrestrial networks to be

connected using their existing devices via satellite-based communications. SCS is a crucial component of the Commission's vision for a “single network future,” in which satellite and terrestrial networks work seamlessly together to provide coverage that neither network can achieve on its own. In order to ensure that prospective SCS operators will be able to comply with the applicable rules, that the public interest will be served by granting their applications, and that harmful interference will be avoided to the greatest extent possible thereafter, the Commission seeks to collect the following information from prospective SCS spectrum lessees.

The Commission has adopted new requirements in its part 1 rules that obligate lessees to provide the following on FCC Form 608: a certification that they are entering a leasing agreement in order to provide SCS; a description of the type of permitted arrangement the parties will enter (*e.g.*, is there a single terrestrial licensee or multiple terrestrial licensees that together hold the required licenses); and, if there are multiple terrestrial licensees, a further description of the leasing arrangement and explanation of how those licensees together hold all of the relevant licenses in a particular geographically independent area (GIA). Entities completing FCC Form 608 for the purposes of providing SCS must also indicate that the application is for SCS by checking a box on Form 608.

This information collection is designed to allow Commission staff to carry out its statutory duties to regulate satellite communications in the public interest; namely, to ensure that prospective providers of SCS will operate in compliance with the applicable regulatory framework. This process utilizes an existing Commission form, which will remove confusion by employing the procedures that are already in place. The modifications for Form 608 covered herein will enable the Commission to more accurately track filings related to the provision of SCS, a critical component of application review given the interplay between part 1 lease filings and part 25 license applications inherent in the SCS framework. This is especially crucial where multiple entities together hold all co-channel licenses in a particular band throughout a geographically independent area (GIA) and wish to deploy a leasing agreement with a satellite operator to provide SCS. Such arrangements are only permitted in the circumstances described in § 1.9047(d)(1)(ii)(A) through (B); specifically, the Commission must be

able to confirm that the multiple licensees in fact cover the entirety of the GIA in question and that, when reviewing related part 25 license applications, the entire area of the proposed service is covered by the associated leases. This collection will thereby enable the Commission to monitor and enforce the entry criteria that SCS providers must satisfy, and which are designed to minimize the possibility of harmful interference. Finally, the collection will play a critical role in the Commission's effort to review and track leasing arrangements that will result in entities providing SCS.

Federal Communications Commission.

Secretary, Office of the Secretary.

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 231221-0314; RTID 0648-XE492]

Fisheries of the Northeastern United States; Atlantic Bluefish Fishery; Quota Transfer From Massachusetts to North Carolina

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; quota transfer.

SUMMARY: NMFS announces that the Commonwealth of Massachusetts is transferring a portion of their 2024 commercial bluefish quota to the State of North Carolina. This quota adjustment is necessary to comply with the Atlantic Bluefish Fishery Management Plan (FMP) quota transfer provisions. This announcement informs the public of the revised 2024 commercial bluefish quotas for Massachusetts and North Carolina.

DATES: Effective November 29, 2024, through December 31, 2024.

FOR FURTHER INFORMATION CONTACT: Matthew Rigdon, Fishery Management Specialist, (978) 281-9336.

SUPPLEMENTARY INFORMATION: Regulations governing the Atlantic bluefish fishery are found in 50 CFR 648.160 through 648.167. These regulations require annual specification of a commercial quota that is apportioned among the coastal states from Maine through Florida. The process to set the annual commercial quota and the percent allocated to each state is described in § 648.162, and the final 2024 allocations were published on January 2, 2024 (89 FR 34).

The final rule implementing amendment 1 to the FMP, as published in the **Federal Register** on July 26, 2000 (65 FR 45844), provided a mechanism for transferring bluefish commercial quota from one state to another. Two or more states, under mutual agreement and with the concurrence of the NMFS Greater Atlantic Regional Administrator, can request approval to transfer or combine bluefish commercial quota

under § 648.162(e). The Regional Administrator is required to consider three criteria in the evaluation of requests for quota transfers or combinations: (1) the transfers would not preclude the overall annual quota from being fully harvested; (2) the transfers address an unforeseen variation or contingency in the fishery; and (3) the transfers are consistent with the objectives of the FMP and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). The Regional Administrator has determined these criteria have been met for the transfers approved in this notification.

Massachusetts is transferring 65,000 lb (29,484 kg) to North Carolina through mutual agreement of the states. This transfer was requested to ensure North Carolina would not exceed its 2024 state quota. The revised bluefish quotas for 2024 are: Massachusetts, 155,862 lb (70,698 kg) and North Carolina, 1,030,996 lb (467,652 kg).

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR 648.162(e)(1)(i) through (iii), which was issued pursuant to section 304(b), and is exempted from review under Executive Order 12866.
