

e. To include a question for the notifying station to report a decrease in the total digital ERP to -14 dBc or below, and provide the date on which such decreased digital ERP operations commenced.

Moreover, to implement the new or modified information collection requirements contained in the *FM Digital First R&O*, sections 73.404(e) and (f) of the rules are revised to allow digital FM stations to use asymmetric power on the digital sidebands and to use the “Maximum permissible FM digital ERP per-sideband” Table to comport with the current limits on FM digital ERP. Additionally, the newly adopted digital FM notification requirements are added to rule section 73.406 in new paragraphs (d)(5) and (d)(6) as follows:

§ 73.406 Notification

(d)(5) Any digital FM station taking any of the following actions must notify the Commission of such action on Form 2100, Schedule 335–FM:

- (i) Upon initiation of hybrid digital operation;
 - (ii) Upon initiation of asymmetric sideband operation at any power level. For FM stations employing asymmetric sideband operation as defined in § 73.402(i), the notification must include a certification that the proposed digital sideband power on each sideband conforms to the Maximum Permissible FM Digital ERP set forth in Table 1 to § 73.404(f), and that the total digital sideband power will not exceed the total power if the digital sideband operation were symmetric. The notifying station may commence asymmetric sideband operation upon filing Form 2100, Schedule 335–FM, and may continue such operation unless notified by the Commission that such operation is not rule-compliant;
 - (iii) Discontinuing asymmetric sideband operation and reverting to symmetric sideband operation. The digital FM station must file Form 2100, Schedule 335–FM within 30 days of discontinuing asymmetric sideband operation; or
 - (iv) Decreasing total digital Effective Radiated Power from a level above -14 dBc to a level at or below -14 dBc. The digital FM station must file Form 2100, Schedule 335–FM within 30 days of decreasing power.
- (6) Any digital FM station seeking authority to increase total digital Effective Radiated Power above -14 dBc must submit Form 2100, Schedule 335–FM. The submission must include a certification that the proposed FM digital Effective Radiated Power is permitted, using the table set forth in

Table 1 to § 73.404(f). Certifications must be based on the most restrictive analog field strength of the proponent at any nearby first-adjacent channel station’s 60 dBμ contour. The station choosing to operate with total digital ERP above -14 dBc may initiate such operation upon approval from the Commission.
